Leaving Chinook

Mr. and Mrs. C. E. Neff To Live In Hanna--First Settlers In This District.

On Tuesday last Mr. and Mrs. C. E. Neff left Chinook to take up their residence at Hanna, where Mr. Neff has been appointed to take up the territory for the Manufacturers Life Insurance Company recently vacated by his son, Edmund, who has been transferred to Nelson, B.C. It is regretted very much by the residents of the district for many miles that Mr. and Mrs. Neff have removed from our town, although we are glad to say we will see them often, as Mr. Neff still retains this district. We can ill afford to lose two such good, cheerful and willing workers, helping with church work, sports, agricultural society and all community work, and always ready to give a word of cheer and encouragement to their neighbors.

In July 1909 C. E. Neff fled on a homestead about four miles south west of where the town of Chinook is now situated. He built a good sized sod house and they opened their home to hold church services and Sunday school. Mrs. Neff kept the minister for the summer months free of charge. Mr. Wm. McLaughlin was appointed superintendent of the Sunday school. A good choir was shortly after organized for the church services, Mrs. Neff being the pianist and Mrs. Isbister the leader.

On Feb. 4th, 1910, a post office was opened, Mr. Neff being appointed postmaster. This was the only postoffice to the east between here and Kindersley, a distance of 100 miles. A few settlers had taken up homesteads in the vicinity the same year, among whom were Messrs Lorne Proudfoot, Wm. McLaughlin, Aitken Bros., Stewart Bros., McColl Bros., Reg. Witt, Joe Massey, P. Demaree, A. E. Roberts, Claus Huhlen, C. W. Rideout, Deman Bros., Jas McNabb, Fred Otto, Milligan, Dobson, Geo. McDonald, E. O. Hoar, P. Peterson, J. Davis and Edgar Barry. W. W. Isbister took up his land a year later, Mr. Isbister did blacksmithing on his farm for the neighbors.

Mr. Neff drove the mail from Bassano, a distance of 110 miles, twice a week. Mr. and Mrs. W. Made were the first passengers he brought out from Bassano. There was a heavy snow storm at the time and it took them three days to make the trip, travelling at times through two feet of snow. However, they landed safely.

On June 2nd, 1910, there was a big snow storm and as there were people for twenty miles in all directions calling at the Neff home to receive their mail, they were unable to leave, so they camped around the house and every available space inside was filled, there being fifty people to sleep and be fed. Mr. Neff kept a grocery store about one year, which was a great accommodation at that time to the homesteaders.

After leaving the farm Mr. and Mrs. Neff moved into the newly organized village and they were responsible for the name of our town, choosing the name Chinook for the post office. Their home was always a stopping place for those travelling through the country.

The Chinook Advance joins their many friends in all good wishes to Mr. and Mrs. Neff in their new home.

School Trustees' Meeting

A meeting of the school board of the Chinook Consolidated S.D. was held in the school Tuesday evening, June 9th, at 8 o'clock. All the trustees were present.

The minutes of the previous meeting were read and adopted.

Then followed the reading of correspondence and of the bills presented for payment, also applications for van driving.

Payment of the following bills were approved:

National Elevator, for coal,	\$20 35
S. H. Smith, on account	5 95
E. E. Jacques, on account	11 45
Workmen's Comp. Board	12 00
C. W. Rideout, stamps	8 00
Robinson Bros., blacksmith	44 15
W. W. Isbister	51 15
Service Garage	6 90
Neil McLean, van driving	5 00

The following additional arrangements were made for van driving: Route 1, N. Schaefer, June 8 to June 18; P. Peterson, June 19 to June 30.

The following resolution was passed: "That the board are of the opinion that the school should not be rented for a dance on June 25th, examinations being on at that time."

In the adjustment of teachers' salaries and the school grades, it was moved that: Providing there are at least 22 students next term in grades 10, 11, and for Algebra, Geometry, Trigonometry and Physics in grade 12, these four grade 12 subjects be added to the High School course next year; in which case salaries, classes and teachers shall be as follows:

Miss Emes, grades 1, 2, 3	\$1100
Miss Godkin, 4, 5, 6	1100
Mr. Nordin, 7, 8, 9	1200
Mr. Korek, 10, 11 and four subjects of 12	1900

If the number in grades 10, 11 and this part of 12 be less than 25, then rooms and grades shall be as at present and salaries as follows:

Miss Emes	\$1100.00
Miss Godkin	1050.00
Mr. Nordin	1200.00
Mr. Korek	2000.00

and in this case no grade 12 subjects shall be taught either during or outside of school hours.

The meeting then adjourned to meet again at the call of the chairman and secretary.

Texas Giants Coming Again

Arrangements have been made for a big afternoon on Wednesday June 25th, when the Texas Giants will visit Chinook and play baseball. It will be remembered that this club visited here last year and everyone enjoyed their demonstration of baseball.

This year they will be accompanied by another team, the New York Giants. A game will be played at 1:30 p.m. between the local team and the Texas Giants. After this game a Minstrel Show will be put on, in which fifteen of the visitors will take part. At 6:30 a ball game will be played between the two visiting teams. In the evening a dance will be given. An 8-piece orchestra will furnish the music.

Heathdale Happenings

A number of people gathered on the diamond near Cloverleaf school last Sunday afternoon and played ball.

Geo. Aitken and nephew, James Aitken, spent Friday visiting at the home of Mr. and Mrs. E. B. Allen.

A meeting of the Collholme local U.F.A. will be held at the Collholme school next Saturday evening.

OUR GROCERY PRICES

Choice Santos Coffee, 3 lbs.	-	-	\$1.00

Fortnightly Crop Report

Issued by the Department of Agriculture, Province of Alberta, May 30, 1931.

The weather during the greater part of the past fortnight has been cool and temperatures reaching as low as 20 degrees have been reported. Growth has been retarded, but frost damage is not serious. Fortunately showers have occurred at many points. The greatest precipitation is reported at Vermilion, where 1.2 inches of rain is recorded on May 11th. Light showers occurred along the main line of the C.P.R. from Calgary to Edmonton. At Claresholm half an inch of rain fell on May 28th, and small showers are reported in the Lethbridge and Medicine Hat districts. The central eastern area has received light showers, but not sufficient to be of value. High winds continue to retard growth, although very little re-seeding has been necessary.

Seeding is from ninety to a hundred per cent. completed and germination has been satisfactory over the greater part of the province. Grain is of a good color and although growth is slow, it is believed that excellent progress will be made with the increased temperatures which may be expected in the near future. In those areas where moisture supplies are very much below requirements germination is patchy and very little growth is being made. In irrigated districts use has been made of irrigation water in order to insure germination of grain and other crops.

There is an increase in the area sown on stubble. This method has been followed largely for the purpose of decreasing damage from soil drifting. The majority of our correspondents report an increase in the acreage seeded to alfalfa and sweet clover. Crops such as beans and potatoes have also been materially increased in the irrigated areas. Pasture and water conditions in the dry areas of the province are becoming serious. Very little growth has taken place and in some instances drifting soil has practically covered pastures. Owners of live stock are experiencing considerable difficulty in obtaining feed and water supplies. In a few instances very slight damage from wire worms and cut worms is reported, but the damage is not serious.

purpose of decreasing damage from soil drifting. The majority of our correspondents report an increase in the acreage seeded to alfalfa and sweet clover. Crops such as beans and potatoes have also been materially increased in the irrigated areas.

Pasture and water conditions in the dry areas of the province are becoming serious. Very little growth has taken place and in some instances drifting soil has practically covered pastures.

Owners of live stock are experiencing considerable difficulty in obtaining feed and water supplies.

In a few instances very slight damage from wire worms and cut worms is reported, but the damage is not serious.

Causes Increased Anxiety

With unbroken drouth throughout this part of the province, anxiety over the crops grows more pronounced. The past week has seen many indications of plentiful precipitation, but invariably the clouds have passed by. Reports are now beginning to come in, telling of the grain in many places being in the short blade and in some instances the grain is "turning." While it is not yet too late to receive beneficial rains, the opinion is fast becoming crystallized that nothing like a good crop is now possible. A country in which a weather forecast is most unlikely to be true, predictions are better withheld. The future remains in the lap of the gods.

E. C. Pfeiffer, assistant at the station, left last week for his vacation. He will visit relatives in California and different places in the States.

No Increase In The Price Of "SALADA" TEA

Insurance Against Depression

A newspaper published on the Pacific Coast prints the following note received by it from a worker in lumber camps: "You need not worry about me. I have worked many years in the logging camps, saved my earnings. Now, during the depression, I am able to get along on three meals a day and a good place to sleep. I am a naturalized citizen. I will vote for the things that make my adopted country a better place to live in."

Commenting on this statement, a magazine writer says it would be difficult to condense the principles of sound economics and good citizenship into smaller space. Let us analyze it a bit.

In the years when work was plentiful this industrious woodsman labored and saved for the common good. But that fat years and lean years had alternated throughout the known history of man. They did in Egypt in the days of Joseph, when amid the scoundings of the masses he stored up grain during seven fat years as insurance against the succeeding seven lean years. Ordinary prudence told this Pacific Coast woodsman that in storing up from the surplus of the fat years he, too, would be able to meet the deficiency of the lean ones.

This woodsman had nothing but his labor to sell, so he sold it at a profit when the market was brisk and saved the profit to provide for his needs when the market should be dull. And "depression" finds him living comfortably and free from worry. He can afford to wait in philosophic patience for the sure advent of another period of fat years.

And, after all, who of us is really differently situated than this woodsman? What, in the final analysis, has any person to sell but his labor? And being sold that labor in times when it is in demand and well paid for, whether in wages, or profitable production from farms, or turnover in business, it surely is the sane and sensible policy, in fact the duty, of the laborer to "save" against the day when there comes a decline in demand for his services and a resultant decline or stoppage in current income or profit.

Everybody but the wholly improvident and thoughtless insure themselves today against sickness, accident, death and old age. They insure their homes, businesses and belongings against possible loss by fire or other catastrophe. They regard these steps as not only wise, but a duty they owe to themselves and their families. In like manner, it is not the part of wisdom, and a duty, in the fat years of earning power to "save" against the lean years which the whole history of man teaches us we inevitably come to.

In all the volumes, and essays, and speeches, and editorials, and articles that have been written or spoken on economic topics, in all the speculations as to causes and cures for the present "depression," can any find a surer specific for economic comfort and independence than that offered by this hard-headed, straight-thinking woodsman? Out of the abundant fat years lay up a store to bridge the shortage of the lean ones. It is simply the old, classic preventive of Industry and Thrift properly balanced. And whenever it has been applied it has worked.

Think Salaries Too Low

Civil Service Federation Holds Wages Paid Are Inadequate

Holding that the civil service salaries are inadequate, the Civil Service Federation of Canada, at the opening session of its 14th national convention in Ottawa, considered the report of its executive committee outlining plans for continued efforts to secure more adequate pay throughout the government service. The executive reported active preparation of the case for the service for higher pay to be laid before the Beatty Royal Commission.

When a man has nothing to do, he always attends to it personally.

Canada's Automobile Output Is Higher

At End Of April Production Showed Substantial Increase

Automobile production shot upward in Canada during April. With a total output of 17,159 cars, the daily average of 572 cars was 37 per cent. higher than in March, although only about one-half the average during April 1930.

The index number of production computed by the Dominion Bureau of Statistics, which started the new year at 60 per cent. below normal, was at the end of April only 26 per cent. below normal.

Believed In Advertising
Over in England, in the village cemetery of Dagenham, Essex, stands a tombstone on which this bit of advertising copy appears:

"Here lies John Steere, who when living brewed good beer. Turn to the right, go down the hill; his son keeps up the business still."

A New Field For The Alpinist
The great attraction of Jasper National Park in Alberta to alpine climbers is no doubt the opportunity it affords for first ascents. There are many important peaks still unconquered and even unnamed and whole regions waiting to be explored.

Inter-Provincial Traffic Council

Saskatoon Board Of Trade Votes Opposition To Proposed Plan

Opposition to the proposed prairie provinces inter-provincial traffic council was expressed at an executive meeting of the Saskatoon Board of Trade. The opinion was expressed that it would not be in the best interests of Saskatoon and Saskatchewan to enter this association.

It was stated that Saskatchewan was in a peculiar position in connection with freight and express rates, and that at present there was a Saskatchewan traffic council which was functioning in a satisfactory manner. J. M. Stevenson, K.C., said Manitoba and Alberta were in far more favorable situation as regards rates than this province. The one had the rate from Vancouver, while the other had the special rate from the head of the lakes.

He said that owing to the geographical situation of the province, sandwiched between two provinces which enjoyed special facilities, it would militate against Saskatchewan receiving concessions. He said that if a move were made for a reduction in rates for Saskatchewan, the other provinces, if the association were formed, would oppose any concession which would give Saskatchewan any benefit.

He also expressed the opinion that Manitoba and Alberta should proceed to organize traffic councils to operate separately and that joint action could be taken on specific problems where there was common ground.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Winnipeg Building Permits

Winnipeg building permits for the month of April total \$1,049,350, as compared with \$838,150 for April, 1930. The total of building permits for Greater Winnipeg to date show an increase of \$90,000 over 1930.

It is believed that the Virgin Islands may establish an industry of raising plants used as insecticide materials, which are now imported at high cost from abroad.

BORDEN'S CHOCOLATE MALTED MILK IS GOOD AT ANY TIME
LIFE is a delightful chase for some day. Lunches, picnics, and dinners, and you will love Borden's Chocolate Malted Milk. It is rich and creamy, with a real MALT flavor that puts a thrilling touch to any meal. Buy a tin of Borden's Chocolate Malted Milk today—your dealer has it in pound and half pound tins.
The Borden Co. Limited
Borden's CHOCOLATE MALTED MILK

Credit Goes To Weir

Has Made It Possible To Retain Federal Tree Nurseries

The federal tree nurseries at Indian Head and Sudbury, Saskatchewan, from where trees have been distributed to prairie farmers free of charge, are to be carried on by the federal government. This service was cut out of the estimates tabled in parliament a few weeks ago, and would have been completely abandoned on July 31, had the government not reconsidered the matter and reversed its first decision.

Not an additional dollar is to be voted for their upkeep, but Mr. Weir will cut down on other expenses within his department to obtain the funds necessary for the work. The decision, favorable to the nurseries, was reached only after Mr. Weir had put the matter before Mr. Bennett on two occasions. On the first he was refused, on the second he obtained Mr. Bennett's consent.

On a motion of Hon. W. R. Motherwell—By Grant Dexter.

Probe Wheat Board

Will Investigate Sale Of Grain By Wheat Board Of 1917 And 1918

The standing committee on agriculture will, in addition to its other duties, examine into the documents brought down in the House of Commons recently in connection with the 11-years' old correspondence between Robert Whiteside, farmer, of Brisy, Sask., and Sir George E. Foster, when the latter was Minister of Trade and Commerce. The correspondence deals with Mr. Whiteside's complaint respecting the sale by the wheat board of the grain crops of 1917 and 1918. In these letters Mr. Whiteside expressed the current belief among the western farmers that the government had made a large sum of money from the sale of the crops.

On a motion of Hon. H. H. Stevens, Minister of Trade and Commerce, authority was given to the agricultural committee to enquire into this.

Recipes For This Week

(By Betty Barclay)

Dainty, delicious and healthful desserts, do not necessarily call for a great expenditure of money. Here are two inexpensive dishes that will please the most fastidious:

FIG AND RICE CONDE

1 cup rice.
2 cups milk.
1/4 cup sugar.
1/2 teaspoon salt.
4 eggs.
1 fig.

Cook rice, milk, sugar and salt in double-boiler. Until rice is tender. Add beaten egg and chopped figs. Remove from fire and flavor. Turn into small molds which have been buttered and dredged in sugar. Set away in warm place until firm. Chill. Unmold when ready to serve, surround with apricot sauce, garnish with whipped cream topped with a fig.

BREAKFAST COCKTAIL

(Serves 1)
1 egg yolk.
2 oranges, juice of.
Pinch of salt.
1 teaspoon honey or sugar to taste.

Beat together and drink every morning.

Persian Balm. Cool and refreshing.

Soothing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth, soft and flawless. Use it for the hands and face. Always results in the highest expression of beauty.

New Catapult Tested

With a deafening roar of compressed-air motors developing 1,000 horsepower, which were utilized to give a sudden pull on a long tow rope, one of Great Britain's largest bombing planes, weighing almost nine tons, was literally hurled into the air in the space of a few yards at Farnborough Experimental Air Field. The new catapult will enable long-distance planes, heavily laden with bombs, to rise from small aerodromes or from the decks of naval carriers.

Uniform Signs For Europe

Roadside warning signs in all Europe will be uniform if the countries across the system adopted at the European Conference on Road Traffic which recently met at Geneva. Danger signs will be triangular, stop signs circular, and information signs rectangular. Should all the countries adopt it the change will mean the scrapping of thousands of signs now in use.

Made Interesting Flight

Professor Believes It Will Revolutionize Theories About Stratosphere

The London Daily Express, in a telephone interview with Professor Auguste Piccard, "stratosphere" balloonist, quotes him as saying that the results of his flight "are likely to revolutionize all previous theories concerning the stratosphere."

"The flight proved that the stratosphere is navigable," the Professor is quoted as having said, "and that man with modern technical methods will be able to master its low pressure and its cold."

Recovered from their perilous thrust into the upper reaches of the sky, Dr. Auguste Piccard has started compiling his scientific data, while Charles Kipfer, his assistant, took a three-hour climb to recover their balloon from the glacier in which it came to rest.

Dr. Piccard said, in conversation with Austrian newspapers, that the stratosphere, he claimed, had been penetrated in an ascent of more than 50,000 feet, was the only practicable element for long distance aviation.

"This can be done, however," he said, "only if the cabins are as airtight as our gondola was."

Information received at Innsbruck, Austria, from Professor Auguste Piccard said that he and his companion, Charles Kipfer, suffered greatly from thirst during their balloon flight into the stratosphere.

"They were forced to scrape the frozen moisture from their breath off the walls of the aluminum cage, the report said, and to melt and drink it."

"The fact that we carried a double supply of oxygen saved our lives," he said. "On landing we found there was left only sufficient for one hour more."

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

Believes Jazz Age Dying

F. Scott Fitzgerald, the novelist who gave the jazz age its name and "discovered" the flapper, believes that the age of jazz has ended, according to a letter received from him by his publishers, Scribners. Fitzgerald said the jazz age lasted ten years from the suppression of the May Day riots in 1919 to the stock market crash in 1929.

The hippopotamus is one of the largest animals, often weighing three or more tons.

MILBURN'S HEART NERVE PILLS
Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

LOSE FAT THIS WAY

No matter how fat you are or how much fat you have, get out and walk a couple of miles—
If you will take half a teaspoon of Kruschen Salts in a glass of hot water every morning for 30 days—
You will feel so good—so energetic, and the urge for activity will be so great that you will immensely enjoy a daily walk of several miles—and lose fat.

Why will Kruschen Salts make this great change for the better in you—it is natural for you to ask.

Because Kruschen is a blend of the six vitalizing salts Nature says your body must have to keep every organ, gland and nerve in the body busily healthy.

While you are losing fat you will be gaining in energy—in endurance—in ambition. Your skin will grow clearer, your eyes will sparkle with the good health that Kruschen brings.

The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll lose fat, and probably live years longer.

To Aid Unemployed

Suggestion Made To Establish Moveable Camps In Each Province

Acting on Bishop Doull's suggestion that "immediate action is necessary with regard to the unemployment problem," the Anglican Synod, the Diocese of Kootenay, B.C. after lengthy debate, adopted a resolution prepared by M. F. Tunbridge, a retired member of the bar and a graduate of Oxford, which that the "as a means of permanent relief against actual distress amongst the unemployed who are willing to work, that moveable camps be established in several parts of each province; that in the said camps shelter, bed, board and clothing be supplied to those in distress who apply; that the said camps be conducted by an officer in charge who shall have full control; that all receiving relief be required to work unless physically unable to do so; that in addition to the work in the construction, extension and maintenance of camps, work be provided in road building and repair, land clearing, and other such work of public utility so far as such work may be undertaken without detriment to settlers and other cities largely dependent upon it for a livelihood."

It was decided to send copies of the resolution to the Dominion and provincial governments, to boards of trade and to other bodies likely to be influential in forming public opinion on this subject.

Felt Tired Out All Day

Could Not Sleep at Night

Mrs. Adamson Lalonde, 2481 St. James St., Montreal, Que., writes:—"After a spell of the grippe I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Foods Stay Fresh

Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods naturally stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exact form, use get "Centre Pull" Packs in short form.

Serious Problems Now Facing Agriculturists Of The West Considered At Ottawa Meeting

Western Canadian agriculture is drifting into peasant proprietorship, the Canadian Political Science Association, in annual meeting at Ottawa, was told by Henry Spencer, M.P., in the discussions following several papers on agricultural problems.

A suggestion that diversified farming for the home market protected by tariffs, as against specialized production for the foreign market, was not received with approval by western economists who spoke. One Manitoba expert pointed out the water shortage, while others dealt with uncertain market conditions. It was stated that mortgage companies were faced with the problem of continuing farms thrown on their hands. They did not want to put in tenant farmers; they were financial, not agricultural concerns.

Mr. Spencer said the only way mixed farming in the west could expand was by guaranteed prices for the products. Butter in the west was now 12 cents a pound, and eggs 5 cents a dozen.

Taxation of farm lands was also discussed. The farmer, it was said, paid more than his share of taxes; his wages were lowest of all and the only way out for some farmers seemed to be through the bankruptcy court.

C. G. Coote, M.P., said the only way out was a revision of the monetary system. He questioned whether it was wise to issue the gold standard. The banks might have to be generous enough to reduce interest rates from nine to four per cent.

Prof. Macintosh, of Queen's University, declared the farmers' income would have to be raised and all the economists who took part in the discussion emphasized the need for research in the agricultural industry.

Mr. Coote thought there had perhaps been too much research in production and not enough in seeking to ensure a fair return to the farmer.

"The farmers of Canada are—willingly or unwillingly—providing cheap food for the rest of the country without paying wages to themselves comparable to wages in other industries. The artisan gets over a dollar an hour—the farmer less than 25 cents an hour."

Prof. J. E. Latimer, of Macdonald College, thus informed the gathering. He declared this situation explained the lack of purchasing power and the slowness of collections which rendered the difficulties of the farming business.

The farmer and his family put in overtime, night work, Sunday work—but the recompense did not mean more than 22½ cents an hour. The yearly earnings of boys in agriculture amounted to only 55 per cent of the general average of earnings in manufacturing.

Prof. Latimer declared, however, that the present depression was not merely a post-war development. Among the factors he held to be involved were: increase in taxation of farming; greater specialization in the industry; greater use of machinery; local organization of the industry and the greater influence of violent fluctuations in the general price level on farming than on other industries.

Prof. F. W. Murchie, of Manitoba Agricultural College, discussed the sociological aspects of the agricultural problem and deplored the prevalence of quick sociologists and rural social uplifters.

Six standard text books on rural sociology, said "Thrift is characteristic of the rural people." Prof. Murchie contended the opportunity to spend was the test of thrift and the farmer had little money.

The fundamental sociological problem at present was the establishment of a truly scientific attitude toward rural social phenomena, he held.

Bert: "Jack, bob down quickly and you will live a second longer." Kasper, Stockholm.

Something To Be Proud Of

Booker Washington's School For Negroes Has Proved Wonderful Success

It is just half a century since Booker T. Washington opened his new "normal" school in a tumble-down building in Tuskegee, Alabama, with the aid of \$2,000 voted by the Alabama Legislature. He began with thirty pupils. And the ideal he held before him was the establishment of the Negro as a responsible American citizen. Tuskegee has just celebrated this jubilee, and if Mr. Washington could have been on the scene he might well have taken pride in the growth of his foundation and its influence. The two-room school-house has grown to a vast institution of some 132 buildings, with an endowment fund of over seven million dollars, which makes its future absolutely secure. Forty trades are taught. Sixteen hundred pupils are accommodated. And in fifty years Tuskegee has proved to the world that the Negro can be a hard worker and responsible citizen, if he is given fairplay and an equal chance.

Would Work In Canada

Unemployment Insurance Advocated By Former Minister Of Labor

Unemployment insurance can be worked out to better advantage in Canada than in any other country, Hon. Peter Heenan, M.P., former minister of labor, declared in addressing an Ottawa service club. "We are already well on the way to adoption of such a scheme," he added.

Under an unemployment insurance scheme, Mr. Heenan asserted, every man participating would have to register, and by extending registration points, all men out of work could register. "If positions could be found for them they could be sent to them. If, however, any man did not want a job which had been found for him, he would not be allowed to further participate in the scheme."

TODAY'S MODEL IS CHIC: Various points about this charming blouse have been well thought out to give its wearer a youthful appearance.

The neckline is so flattering in deep open "V," softened by pleated frill. Two types of sleeves are provided. The short sleeves gathered into a narrow band are particularly favored by youth.

A snugly fitted yoke secures that important flat slowness through the hips. It's shown in plaided crepe de chine in opal yellow and brown, so suited for town or resort.

Style No. 352 may be had in sizes 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 1½ yards of 39-inch material.

Eyebelt, halter, dainty, lawn, net, shantung and jersey are smartly appropriate.

Price of Pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

GOVERNOR-GENERAL OPENS NEW STATION

His Excellency Lord Bessborough snipping the tape before the doors of Hamilton's new Canadian National Railway Station. After the Governor-General had used the scissors of gold provided for this ceremony, he unlocked the doors with a gold key, and declared the station open.

A Link With The Past

Sole Survivor Of Palliser Expedition Of 1858 Is Dead In Alberta

Peter Erasmus, 97, sole survivor of the Palliser exploration expedition of 1858, probably sole survivor of the historical Red River settlement in Manitoba, which was founded by Lord Selkirk, and one of the province's most notable citizens as a result of his participation in Alberta's early history-making acts, is dead.

The aged man, extremely infirm and nearly blind in his later years, died recently at Whitefish Lake, near Cold Lake.

Oldest employee on the Canadian civil service list, Peter Erasmus was still retained as assistant interpreter at a yearly salary of \$200, in recognition of his work in framing Indian treaties in the early days. He also was an Alberta old-age pensioner.

Erasmus was a resident in Alberta since 1855, with the exception of the time spent on the Palliser expedition, which sought and located a southern Alberta pass through the Canadian Rockies to the coast. It is known today as Kicking Horse Pass.

His father was a Dane, who had served in the British army, fought at the battle of Waterloo and emigrated to Canada, entering the service of the Hudson's Bay Company.

His mother was a French half-breed and Peter was the fourth of six children and as soon as he was old enough went to a school conducted by the Rev. Mr. West, Anglican minister, who was the first Protestant minister in the settlement.

The Age Of Youth

Great Opportunity Now For Young Men Says Governor-General

"This is the age of youth," the Earl of Bessborough, Governor-General of Canada, smilingly told graduating students of McGill University as he stood on the rostrum at convocation in the robes of a doctor conferred upon His Excellency a few minutes before by Vice-Chancellor Sir Arthur Currie.

"One of the most remarkable changes in my own lifetime—and my generation has seen a great many changes—is the marked decrease in the average age of those holding positions of trust, in every walk of life. In the service, in the law, in politics, science and industry, young men and young women can now be found in posts of responsibility that, 30 years ago, were held exclusively by grey-beards."

Crop Yields Count

Correct Methods Of Soil Management Are Essential

"In all branches of farming whether it be stock raising, grain growing, mixed farming, orcharding, or market gardening, the degree of success resulting therefrom will depend primarily on the crop yields obtained. While seasonal factors—rainfall and its distribution, temperature, etc.—have a determinative influence on yields, correct methods of soil management and the presence of available plant food are essential to maximum production," writes Dr. Frank T. Shutt, M.A., D.Sc., in Department of Agriculture bulletin No. 146-N.S. "Factors and Fertilizers—Their Nature, Functions and Application." This bulletin treats concisely with all the important phases of the subject; farm manures, their nature, care and application; green manures, their value and function; commercial fertilizers, their plant food content and economical use; and soil amendments.

Two Ontario Cities Celebrate

Kingston and Hamilton Have Passed Their Eighty-Fifth Birthdays

Two of Ontario's finest cities have celebrated the eighty-fifth anniversary of their cityhood. Kingston was incorporated as a city on May 18, 1846; Hamilton on June 9 of the same year. It is being said of Kingston that it is "Ontario's oldest city." In the strict sense of cityhood, this is not the case, for Toronto was incorporated as a city on March 6, 1834, and in a few years will be a centenarian. But Kingston is much the older settlement. Although Brule journeyed the Humber in 1615 and, standing on what is now Toronto soil, was the first white man to view Lake Ontario, there was no trading post on the Toronto site until 1749, when the French established Fort Rouille. But Frontenac established Fort Frontenac at Cataract (now Kingston) in 1673.

Alberta Place-Names

The first reference to coal in Alberta is contained in a map of Aaron Arrowsmith. It is that of Edgewood Creek, known today as Rosebud River. Concerning this stream Arrowsmith says "great quantity of coal in this creek"—Geographical Board of Canada.

San Marino is the oldest existing republic. It has had 10 centuries of uninterrupted existence.

Canada Is Credited As The First Nation In Modern History To Take Census Of Inhabitants

Research Is Yielding

Interesting Result

Revenue May Be Derived From Refuse Screenings At Grain Elevators

New uses for surpluses of wheat and other grain are being made the subject of an exhaustive survey by the National Research Council of Canada. Two researches initiated are already yielding interesting results. One of these is a study of the refuse screenings, largely weed seeds, which accumulate at the grain elevators at the head of the Great Lakes to the extent of more than 50,000 tons a year. At present these screenings, if marketable at all, fetch almost nothing. The research is already indicating that they could be made to yield products—oil for soap-making, fertilizer and possibly feed—which would make them distinctly valuable.

In the other research a beginning has been made on the problem of finding methods of utilizing straw. The total amount of straw grown in Canada each year aggregates about 50,000,000 tons, most of which is wasted. A careful study of the possibilities of using surplus grain for the manufacture of fuel, alcohol, starch, dextrine, glucose, and other sugars, acids and lacquer solvents by means of fermentation, oils, etc., is being made. This includes a study not only of the technical but also of the economic aspects.

Canadian Buffalo For Holland Zoo

Magnificent Pair Have Been Shipped From Wainwright To Rotterdam

A magnificent pair of Canadian buffalo, male and female, from the National Park at Wainwright, Alta., passed through Winnipeg a short time ago by Canadian National Railway freight en route via Montreal to Rotterdam, Holland, where they will be placed on exhibition in the Rotterdam Zoo. Extreme care was necessary in the shipping of these animals on account of their semi-wild condition, and they were loaded in individual crates in which they will be confined until they reach their destination.

Farmers Buy Pullets

A new factor in the poultry outlook at the present time, as reported by the Poultry Division of the Dominion Live Stock Branch, is the extent to which farmers in many parts of Canada are now buying six, eight and ten week old pullet chicks. With the unprecedented slaughter of laying fowl and pullets, which is still going on all over the Dominion, the demand for replacement stock which will come into production in October and November is increasing.

British Navy Keeps To Oil

Efforts to induce the British Admiralty to assist the coal industry by reconverting some of the ships in the navy from oil to coal fuel have failed. The change was voted down at a recent meeting in London, England, of miner M.P.'s and representatives of mining companies. It also was strongly urged that the coal industry should be helped by the development of the processes of distilling oil from coal.

An electrical flip to destroy flies has been invented. That should show them what swat?

Perhaps it may be rather an extreme claim that "Canada" should be credited with the distinction of being the first nation in modern history to take a census of its inhabitants, few of whom, at that day, were greatly concerned with the doings of the actual government. But it appears to be undoubted that the French authorities in charge of the affairs of the colony, then known as "New France," for their own information and reasons did, in the year 1666, undertake a systematic registration of the then European inhabitants, each one being recorded by name. The compilation also stated the age, sex, place of residence, occupation and conjugal condition of each person. According to the Brandon Sun, the original is extant in the archives of Paris, a transcript being available at Ottawa. It would be interesting to know just why this "census" was undertaken, certainly it is unlikely that its originator realized just what he had accomplished or how it would be regarded long after he had passed away.

This initial Canadian census, the Sun continues, was repeated several times during the French regime. After its disappearance a series of less elaborate investigations by successive governors took its place. The first legislation on the subject was an act of the United Provinces, dated 1817. Under it a census of Upper and Lower Canada was taken in 1851 and again in 1861. Censuses of Nova Scotia and New Brunswick were taken in the same years. An account of these and of preceding investigations may be found in Volume IV. of the report of the census of 1871, a volume designed to start the new Dominion on its career with a review of all previous statistics relating to its domain. Comprehensive censuses under the act of Confederation have followed every tenth year, namely in 1881, 1891, 1901, 1911 and 1921.

Prizes For Remounts

To Stimulate Interest In The Breeding Of Horses Of The Right Type

Major the Hon. Robt. Weir, Federal Minister of Agriculture, has authorized the payment of monies totalling \$825 to owners of horses used by Canadian cavalry units during the 1931 training season to be distributed as prizes to encourage the suitability of horses for army remount purposes. Each regiment will be allocated \$25 in prize money to be awarded in the form of a first prize of \$15 and a second of \$10, while a suitable ribbon will designate third placing. The object of these awards is to stimulate interest in the breeding of horses of a type which has been proven generally satisfactory for all-round purposes.

German Method Is Thorough

The latest method of cleaning railway coaches is that used in Germany. The coach is run into a huge airtight cylinder into which is pumped a strong disinfectant gas. The carriage remains in the gas long enough to allow it to penetrate every chink and corner, so that all harmful bacteria are killed.

Valuable Fish By-Products

Of the various by-products of fish, including fish meal, fish oil, fertilizer, herring scales for pearl essence, poultry grit, glue, whalebone, the 1929 production value was \$3,100,000, according to the Fisheries News Bulletin.

Hindu From Manchester

Secretary: "Do you wish to see Abdullah Rajaputra, the great Hindu clairvoyant, madam?" Visitor: "Yes, young man. Tell him it's his sister from Manchester."

All the honey a bee gathers during its life doesn't sweeten its sting.

Merchant: "Do you know who I am?"

Son of Chauffeur: "Yes, you are the man daddy always takes out in his car."—Karikaturen, Oslo.

Model Locomotive Attracts Attention

The scale model engine, shown in the above picture, is an exact replica of one of the Canadian Pacific Railway's "2800" type fast passenger locomotives and attracted considerable attention at the model railway exhibition, recently held in Central Hall, Westminster, London, England. Built for the company, in England, the model is 14 feet long and weighs half a ton. It is constructed to the scale of 2 inches to one foot and is finished in correct C.P.R. colors. The young "engineer" in the picture seems to be enjoying his tenure of office and, doubtless, knows how to run the engine, which is a complete working machine, with all that is necessary to convey a realistic representation of its powerful original.

"Dad, what is a boss?"
"A boss, my son, is a man who comes to the office too late when I am early, and too early when I am late."—The Passing Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Scotland is operating its first plant for the production of motor fuels from shale oils.

Despite low world metal prices, British Columbia took more out of its mines in 1930 than in any previous year.

Five hundred patients were transferred to safety by nurses when the Kanagawa hospital at Tokio was partly destroyed by fire.

Automobiles imported into France last year were valued at about \$13,000,000, an increase of 11 per cent. over 1929.

A cable received by the Department of Agriculture stated that 465 head of cattle of the "Manchester Brigade" met with a sharp market at Birkenhead, England.

The German government has instructed its ambassador in Paris to lodge a strong protest against repeated flights over German territory by French military planes.

Mrs. Charles A. Lindbergh has won the rank of a full-fledged aviator. The world's export trade for 1930 was about 90 per cent. the size of the 1929 trade.

According to the German trade statistics, Canada occupied seventh place as a source of supply for the rubber footwear imported into Germany in 1930.

Representation of the province of British Columbia on the board of railway commissioners will receive consideration when the vacancies on the board are being filled.

Collection of an income tax from the United States firms which sell goods to Canadian customers through any person in Canada, is reported by the Department of Commerce to be causing much concern among those taxed.

Girl Guides Meet

Large Representation Attends Annual Gathering Held This Year in Winnipeg

Nearly every corner of the Dominion of Canada was represented at the annual meeting of the Canadian Council of the Girl Guides' Association held at Winnipeg recently. Fifty delegates attended the inaugural ceremony following which reports, representing a vivid picture of the Girl Guides' activities, were read.

It was indicated that the movement was rapidly gaining strength. "Girls today are not wild, they are wonderful," Mrs. H. D. Warren, chief commissioner of Girl Guides in Canada, told members of the Women's Canadian Club here.

"I hear many people say that the modern girl is wild," said Mrs. Warren. "She is not. She is honest and speaks her mind openly and frankly, a thing that is charming and genuine. I think the girls of today have in them the making of wonderful citizens."

Paint of a dark greenish hue has been found in England to make airplanes nearly invisible when flying against clouds or in the rays of searchlights.

Host: "My mother-in-law nearly laughed herself to death at my jokes. I hope you will come again soon and stay longer."—Hummel, Hamburg.

SUNDAY SCHOOL LESSON

JUNE 14

THE RESURRECTION AND THE ASCENSION

Golden Text: "It is Christ Jesus that died, yea rather, that was raised from the dead, who is at the right hand of God, who also maketh intercession for us."—Romans 8:34.
Lesson: Luke 24.
Devotional Reading: 1 Corinthians 15:50-58.

Explanations and Comments

The Interview On the Way To Emmaus, verses 13-31.—On the day of Christ's resurrection, two of His disciples (not apostles), were on their way to the village of Emmaus, seven and a half miles from Jerusalem. Disillusioned and dejected, they were talking over the sad events of the last few days, when Jesus drew near and walked on beside them, but "their eyes were hidden that they should not know Him." "Holden," is the archaic form of "hold." They were absorbed in their sorrow; they were not expecting to see Jesus; and Jesus' appearance was evidently changed. Luke 24:37; Mark 16:7; John 20:14, 15; 21:4. Jesus began to question them and to lead them to understand the Scriptures. "What communications are these that ye have one with another?" He asked.

"What communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked.

"What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked.

"What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked. "What manner of communications are these that ye have one with another?" He asked.

Social Inertia Allows Disease To Flourish

Many Children Die Needlessly Health Association Is Told

"There is cause and effect at the bottom of every disease, and we should teach people to make health a matter of good management," said Prof. Roy Fraser in his address before the community health Association of Greater Toronto at their annual dinner in Hart House.

"If a child dies needlessly, someone tries to solve the parents that it was the will of God—that's blasphemy. It never was the will of God that a child should die.

"These things have to happen, people will say. They don't have to happen. When people learn that disease is a result of cause and effect, and not a divine act, then you will have courage to go out and conquer it.

"Medical science has gone a long way, but there is no serum for prostration, and no vaccine for pig-headness. Disease will be with us as long as we have social inertia."

In speaking of health education in the schools, Prof. Fraser stated that if the curriculum was too heavy to take care of it, it should be unloaded to make room for learning something the children have to know. We ought to know as much about our bodies as we do about a carburetor of a car.

"We need a closer co-operation between those who heal and those who teach. The doctor and the nurse should lead, and everyone else follow. I have never heard a politician make public health a plank in his platform, and yet the national loss through war, tariffs, financial depression, accidents are heavy, but our economic loss due to disease would top them all.

For communities to argue that they had no concern with the health of their people was as foolish as to argue that only those who had a fire should pay for the fire department, and only those robbed should pay for the cost of bringing criminals to justice.

"We are now on an era of preventive measures in the matter of health," the speaker said.

Honor Memory Of Wolfe

Laurel Wreath Placed On Mural Tablet At Bath, England

The memory of General Wolfe was honored at Bath, England, when Frederick Parker Burden, agent-general for British Columbia, placed a laurel wreath on the mural tablet of the beautiful old Georgian house where Wolfe was living when he received his commission to go to Quebec.

The ceremony was followed by the Royal Empire Society Bath branch luncheon, at which Mr. Burden was chief speaker in place of Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, who was called to Geneva.

"Isn't your little son sweet? He told me I was pretty." "Did he? I must take him to an oculist."

The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

WILAT CAME BEFORE: Captain Jimmy and his dog Scottie got lost in the out some were pushed out, others simply fell out. But in less time than it takes to tell it, there was not a hand on board.

What next? Twenty the boat was alive with Chinese hands. "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Scottie!" "What next? Twenty the boat was alive with Chinese hands. "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

"Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!" "Jimmy! I'm a hand, Captain!" said the owner of the boat. "But not Chinese hands!"

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. Pound and half pound tins at your grocers

High Academic Honors Talented Artist Dead

Woman Medical Student At McGill University Awarded Gold Medal

For the first time in the history of McGill University, a woman student has carried off highest academic honors in the faculty of medicine. Miss Katherine H. Dawson, of Westmount, Quebec, was awarded the Holmes gold medal for the highest aggregate standing in the five years of her course, together with the first place in aggregate honors in the final year.

Miss Dawson was also chosen to read the valedictory address of the faculty of medicine this year.

Forests a Valuable Resource Forestry is the most profitable, if not the only, use to which one-third of the land in Canada can be devoted.

Plenty Of Leeway Sir James Jeans predicts the world will end in a million years. Which should give plenty of leeway to the experts who are predicting that prosperity is just around the corner.

American medical colleges graduate only about 200 women doctors a year.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

THE SMART PARISIENNE KNOWS THE PRACTICAL WORTH OF SIMPLE CLOTHES

Take today's style—it will be popular through the entire spring and summer season.

What an economical choice! And a dress that can travel in the best of circles. It is light navy blue flat crepe silk. Cute decorative pieces of self-fabric adorn the sleeves and finish the neck. They are carried down the bodice in diagonal line to detract from its slenderness.

Style No. 190 may be had in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust.

It will be difficult to find a more simple model to fashion, and yet at the same time, one that is so exceptionally smart and wearable. Printed crepe silk, wool jersey, tweeds, crepe woolsens, shantung, linen and novelty cottons are also suitable for this jaunty model.

Price of Pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Unexpected Results

A little London girl was given a long window flower box and some packets of seeds by her uncle and told she might sow them, and have her own garden on the nursery window sill. She was also told to water them well. A few months afterwards her uncle came again to see her and asked, "Well dear, did you sow your seeds?" "Yes, uncle," said the child. "Did you water them well?" "Yes, uncle, very well." "And did anything come up?" "Yes, uncle, a policeman!"

Canada's Forest Land According to the Forest Service of the Department of the Interior, commercial forests can be grown on 55,000,000 acres of Canada's domain, and that on 182,000,000 acres the forests are either at present inaccessible or are of value mainly for their ameliorating effect on climate, the control of water flow, protection of erosion or their scenic attractions.

Romney Marsh, England, with a population of nearly 3,000, has had no reported cases of drunkenness for 12 years.

FUTURE TRADING STAMP FINDS IS HELP TO FARMER

Ottawa, Ont.—The farmer receives a higher price for his grain as a result of the present system of futures trading. This is the chief conclusion of the government commission headed by Sir Josiah Stamp, British economist, whose report was tabled in the House of Commons.

While recommending the retention of futures trading as the best method of adding security to the producer's position, the commission believes public confidence in grain trading would be increased and suspicions of producers abated if a degree of government supervision were employed.

The report deals exhaustively with the many phases of grain trading and follows examination of over 50 witnesses in Winnipeg, Regina, Calgary, Minneapolis and Chicago. Hearings began on April 13 in Winnipeg, and work of the commission was concluded two weeks later in New York. Besides Sir Josiah Stamp, other members of the commission were Chief Justice J. T. Brown, of Regina, chosen by the prairie governments to represent the farmers, and W. Sanford Evans of Winnipeg, representing the grain trade.

The commission urges caution in giving too great effect to the periods of abnormal fluctuation such as in 1920-21 and 1929-31 and base their conclusions on normal times.

Dealing specifically with the reference to the commission—"to inquire into and report upon what effect, if any, the dealing in grain futures has upon the price received by the producer"—the findings may be summarized as follows:

There is no effect upon the long period major trends of price, which must find their position relative to the price of other commodities in the long run.

Major fluctuations in price from year to year and quarter to quarter are lessened "to make the producer's position more stable and secure."

Minor day to day oscillations are increased, but these tend to level off major fluctuations and benefit the producer. Also gamblers lose money in such a way as to increase the producer's price.

Apart from the fluctuations, the effect is "less certain, but with a high degree of probability, to increase the average price received in the long run by the producer, to an indeterminate but appreciable extent."

If Canada were to abandon futures trading while the rest of the world retain it, there would be a disadvantage for Canadian wheat "which would definitely fall upon the producer in a lower price."

Willing To Reciprocate

New Zealand Would Negotiate Trade With Canada

Wellington, N.Z.—Prime Minister G. W. Forbes made it clear that New Zealand was still willing to negotiate with Canada regarding inter-domain trade, but he expressed disappointment with Canada's failure to heed New Zealand's representations regarding the Canadian duties on imported butter.

The prime minister said he hoped Canada would agree to send her minister of trade to New Zealand to negotiate a new trade treaty. New Zealand had been forced to show a strong hand—in placing Canadian imports on the general tariff scale—in view of Canada's "complete failure to listen to representations regarding the butter duty," he said.

Income Tax Changes

Changes With Two Exceptions Based On Next Year's Taxes

Ottawa, Ont.—All the income tax changes brought down in the budget are applicable to next year's taxes excepted, it was explained by the Department of National Revenue. In the case of the increase in the rate from eight to ten per cent. on the income for corporations and joint stock companies, the additional two per cent. will have to be paid on the earnings already in, based on last year's income. The other exception is a tax of two per cent. collected at their source on dividends payable to non-resident shareholders. This comes into force on July 1 next.

Chinese Refugees Suffering
Hankow, China.—Large numbers of refugees seeking to escape roving bands of Communists and bandits in northwestern China are arriving in Suifu province, bringing tales of terror and suffering.

W. N. U. 1893

Empress Greeted By Notable Canadians

Governor-General Attends Dinner Given On New C.P.R. Liner
Quebec, Que.—To join with the Prime Minister and many other distinguished citizens of the Dominion, in the general welcome which has been extended to the "Empress of Britain" on her arrival in Canadian waters, the Governor-General paid a visit to Quebec and attended a dinner held on the vessel on June 3.

President E. W. Beatty, of the Canadian Pacific Railway, presided over a company numbering some 500 which included, in addition to His Excellency and the Prime Minister, Sir Robert Borden, Gen. Sir Arthur Currie, Hon. Hanford MacNair, United States minister to the Dominion, Sir William Clark, British minister at Ottawa, Hon. E. Lapointe, Premier L. A. Taschereau, Sir Joseph Flavelle, Sir Herbert Holt.

Lord Bessborough, commenting on the initial performance of the "Empress of Britain," said the "Empress" had proved herself mistress of the high seas and had entered the new world by way of the greatest and most spectacular highways.

Itinerary Of Air Pageant

Planes On Trans-Canada Tour Leave Hamilton July 1

Kingston, Ont.—Dominion's great trans-Canada air pageant will begin on July 1, when more than 50 planes will leave Hamilton to commence the 7,700-mile tour of Canada, and will wind up at the Toronto Canadian National Exhibition, according to official announcement by Marshal M. Foss, publicity and show manager of the air pageant, sponsored by the Canadian Flying Clubs' Association.

The official itinerary as announced by Mr. Foss gave dates on which the armada will reach cities in the west as follows: July 7, Minneapolis; July 8, Winnipeg; July 10, Brandon; July 11, show at Winnipeg; July 13, show at Regina; July 14, and 15, Moose Jaw; July 16, Medicine Hat; July 17 and 18, Calgary; July 19, Lethbridge; July 20, Vancouver via Grand Forks, with show at Vancouver; July 26, Lethbridge; July 28, Edmonton; July 31, Saskatoon via North Battleford; August 1, show at Saskatoon; August 3, show at Winnipeg; August 6 and 7, show at Fort William.

Duty On Magazines

Educational, Religious and Scientific Publications To Be Exempted

Ottawa, Ont.—Officials of the Department of National Revenue will consider each magazine coming into Canada, and decide which shall be exempted from the 15 cents a pound duty which will be imposed under the provisions of the budget. The duty does not come into effect until July 1. The magazines to be exempted as defined by Premier R. B. Bennett will be educational, scientific and religious. The list prepared by the department will be submitted to the cabinet for final acceptance.

Some magazines coming into Canada weigh over a pound per copy, and in some cases, the duty will be more than the present cost of the magazine. With magazines totalling several million copies coming in every year, the taxes from this source should be considerable.

The New Taxes

Postage Increase Comes Into Effect On July First

Ottawa, Ont.—The new taxes imposed by the Bennett budget come into force on the following dates: New customs tariff effective midnight, June 1. Sales tax effective midnight, June 1.

Corporation tax effective on income for 1930.
Income tax effective on 1931 incomes.
Income tax on foreign investments in Canada effective July 1.
Postage increase, July 1.
Postal rate on newspapers, July 1.
Stamp tax on cheques, July 1.
Insurance policy tax, October 1.

To Break Deadlock

Negotiations Being Carried On Between Vatican and Italian State

Rome, Italy.—Secret negotiations to break the deadlock between the Holy See and the Italian state in the present crisis is in progress.

Following the closing of Catholic youth clubs by the Italian Government, it was learned from a good source that conversations are being conducted by Cardinal Gasparri, who signed the Lateran treaty and concord in 1929 with Premier Mussolini.

DEPORTATION BILL IS OPPOSED BY MINISTER

Ottawa, Ont.—A measure preventing the deportation from Canada of persons who have been resident here more than ten years, was "talked out" in the House of Commons. The bill, which came up on second reading, under the sponsorship of J. S. Woodsworth (Labour, Winnipeg North Centre), may possibly be reached again this session.

From Hon. W. A. Gordon, Minister of Immigration and Colonization came a clear and emphatic statement in opposition to the proposal. The effect of the bill, Mr. Gordon declared, would be to destroy sections of the Immigration Act for the deportation of prohibitory classes, including idiots, imbeciles, insane and feeble-minded persons, diseased persons, people of unsavory character, and other physically or mentally deficient.

Dealing with "prohibitive classes," Mr. Gordon remarked that migrants who became mental cases in Canada were not cared for by the Dominion Government, but the burden fell upon the municipalities and the provinces. The provinces of Canada, had expended millions upon millions of dollars for the care of these people. Ontario, with which Mr. Gordon was most familiar, had invested some thirty-eight million dollars of capital expenditure in institutions to take care of the sick and afflicted at the present time. Canada's neighbors to the south had many thousands of cases with which the Department of Immigration is dealing every day, who, if we let down the bars, would be sent back to Canada, where they have no right to come.

Mr. Gordon emphasized the deportations were only ordered after the fullest inquiry. Many people of a splendid type had come to Canada who were an honor today to this country; but there were some within our boundaries who, under careful selection and the discipline of immigration, never would have been permitted to come into Canada.

A. A. Heaps (Labour, Winnipeg North), who, in the absence of Mr. Woodsworth, moved the second reading, said it was "most unfair" to deport persons from Canada who had been resident here for many years. In recent months many persons, the majority born in Great Britain, had been deported. Some had been here as long as 18 years, had raised families in Canada and, late in life, becoming ill, had become public charges. He believed the 10-year limit suggested in the bill was too long and that five years' residence in Canada would be sufficient. Men and women born outside the British Empire might be naturalized in Canada after five years' residence and escape deportation. This was an injustice to British subjects, he believed.

England-S. Africa Phone Service
Cape Town, S.A.—Wireless telephone service between South Africa and England will be opened shortly, according to an announcement made by Hon. H. W. Sampson, Minister of Posts and Telegraphs in the House of Assembly, recently.

MOUNTAIN PEAKS BECKON ALPINE CLUB

Among the mountain peaks that will beckon to Alpine Club campers this summer are the Tower of Babel (right), reflected in beautiful Moraine Lake; the craggy summits above Lake O'Hara which invite the intrepid (left), and picturesque Eagle's Eyrie (centre), just a step from Prospector's Valley, where camp will be struck. Standing stark against the sun, the Eagle's Eyrie is startlingly like the king of birds, but fashioned in stone, serves merely to provide shade where mountaineers halt to drink tea.

MAY RETIRE

Col. Grant Morden, well known Canadian residing in England, is reported to have decided to retire from his seat in the English House of Commons. At present he is recovering from a serious illness in his home in the British Isles.

Trade With New Zealand

British Columbia Anxious For Consummation Of New Agreement

Victoria, B.C.—"It is important in the interest of our export trade that a new agreement with New Zealand be consummated in the near future," F. C. Brown, chairman of the British Columbia division, said in presenting his report to the convention of the Canadian Manufacturers' Association.

New Zealand's action in withdrawing the British preference from Canada, combined with the Canadian budget provision placing a duty on plate, would hit the canned salmon industry hard, the speaker said. Brown's address forcibly directed the attention of the manufacturers across the Pacific. He was hoping from day to day to see announcement of the conclusion of a new agreement with Australia which would continue the present preference on paper, fish and lumber, and extend that on lumber. Since the termination last October, of the agreement with New Zealand, trade with that dominion had fallen off rapidly.

The report of the prairie division, read by Arnold Smith, Winnipeg, said "the courageous manner in which our agricultural population has prepared for another crop should be a very definite corrective to those fatalists who appear to think that our economic fabric is irretrievably damaged." "It is more than likely that the position of our overseas markets for grain and farm produce will steadily improve."

R. J. Hutchings, Calgary, said the farmers were bucking down to putting in a crop at half the price of late years, due to the cost of seed and other elements. The prairies, he declared, were going to maintain their position of growing the best wheat and supplying it to the world markets.

U.S. Debt Increases

Washington, D.C.—After government finances had been discussed by President Hoover and his cabinet the White House announced the national debt would be increased \$500,000,000 for the fiscal year ending June 30, because of falling revenue and increased expenditures.

Grain Shipments For May Were Higher

Larger Quantities Shipped Overseas Than In Previous Months

Fort William, Ont.—Canada's hold on foreign wheat markets remained firm through May, the Dominion shipping larger quantities overseas than in any month for more than a year. Clearances during the last week, according to the weekly report on grain movement by E. A. Ursell, statistician to the Dominion Board of Grain Commissioners, amounted to 6,853,533 bushels and swelled the five-week total to 34,180,796 bushels.

Export Market For Butter

Good Market For Butter and Cheese In Great Britain

Montreal, Quebec.—Canada will have a good butter and cheese export business with Great Britain this year, according to P. W. McLagan, Montreal butter and cheese exporter, who has just returned from a visit to Great Britain.

There was a place for Canadian butter in England, he declared, and as the market was not overloaded and as long as Canadian prices and quality were right, he thought that there would be steady sales throughout the 1931 season.

WILL FIND A WAY TO BUILD TRANS-CANADA HIGHWAY

Ottawa, Ont.—Before long the government hopes to have a satisfactory solution to the problem of building a trans-Canada highway. Hon. R. J. Manion, Minister of Railways and Canals, told the House of Commons. It was too soon, he said, to charge the government with failure to keep its election promises.

Dr. Manion was speaking in the debate on the highway started by J. A. Bradette (Lib., Timiskaming North) on a motion to go into supply.

Nelmer Mr. Bradette nor Hon. Peter Heenan, former Minister of Labor, had been consistent in their attitude towards the highway, said Dr. Manion. When the Liberal Government had been in power a motion had come before the House urging the government to make grants towards the construction of highways and both Mr. Heenan and Mr. Bradette had voted against it. "They were in no position to accuse the present government of breaking its pledges so early in its term of office. It did not accuse you of breaking your pledges," said Mr. Heenan. "I merely asked you to fulfill them."

"The question of the trans-Canada highway is a very big question. It has not been overlooked. The government has it under consideration and we hope before long to have a satisfactory solution."

The record of the Liberal party had been consistent in matters of grants to provinces, declared Mr. Hon. Mackenzie King, adding it might have resulted in some political losses. When assuming office in 1921, he said, the treasury was empty, encountered, necessitating economy if the budgets were to be balanced and debt and taxation reduced. In one direction, this was done, namely, by refusing grants and aids to provinces in addition to the subsidies fixed at confederation.

"I am not opposed to subsidies to provinces," exclaimed the Liberal leader, "but I am opposed to sums of money being voted by this parliament to the provinces in addition to those subsidies." Such extra grants never were contemplated by the fathers of confederation.

"Where will the end be?" asked Mr. King, as he enumerated the grants paid during the past 10 years to the provinces in addition to the regular subsidies. They were for agricultural instruction, to co-ordinate unemployment offices, to encourage highway construction and technical education, combating disease, relieving unemployment; the old age pension scheme. The total was \$57,900,000. During that time, the statutory subsidies paid by the Dominion to the provinces amounted to \$150,000,000. "The principle of the old age pension scheme is thoroughly sound. In order to get the scheme in operation, I was prepared at that time to support the principle of grants to the provinces, which, I admit, is unsound."

The time had come, Mr. King repeated, when the federal parliament should vote 100 per cent. of the cost of the pension scheme, and centre administration in Ottawa. In his budget recently, Premier Bennett had continued this "unsound principle" of the federal treasury assuming a portion—75 per cent.—of the scheme.

SAY CONFERENCE AT OTTAWA IS TO BE POSTPONED

London, England.—It was believed in well-informed circles in London that the Imperial economic conference in August at Ottawa would be postponed. The conference was intended to continue the discussions on Empire economic unity inaugurated at the last Imperial meet.

Reasons for belief that postponement would be announced are listed as pending general elections in Australia, New Zealand's economic crisis, South Africa's "reluctance" to send delegates to Ottawa at the present time, India's own pending round-table conference and an apparent division of opinion in the British government on the question of wheat quotas.

Under the heading "The Doomed Conference," The Conservative Evening Standard declared the attitude of the Labor Government indicated nothing substantial would come from the Imperial economic conference if it was held at Ottawa next autumn.

The possibility of closer Imperial economic co-operation depends on Britain's willingness to accept a system of tariffs, the newspaper continued. "Cut that away and there is nothing left. The dearest principle of those who control this government rules out the only possible solution and reduces that discussion there may be at Ottawa to a meaningless exchange of words."

Duty On Anthracite Coal

Revenue Of \$1,250,000 Is Expected From This Source

Ottawa, Ont.—The duty of 40 cents a ton on anthracite coal announced in the budget would result in a revenue of a million and a quarter dollars if the purchases of this type of coal from the United States continues at the same rate as last year. In the calendar year 1930, Canada bought from the United States 3,235,037 tons of anthracite.

The duty on bituminous coal has been increased from 50 cents to 75 cents a ton. Canada imported 13,745,563 tons of bituminous coal last year from the United States, but considerable of it came under the drawback which returns to importers using soft coal for smelting purposes 99 per cent. of the duty.

In the last fiscal year Canada imported from the United States 1,156,363 tons of coke free of duty. Under the new tariff this will carry a duty of a dollar per ton.

Plan Flight To Orient

Colonel and Mrs. Lindbergh May Fly To Japan This Summer

New York.—Confirmation from Colonel Charles A. Lindbergh that he and Mrs. Lindbergh will fly to Japan and China was obtained by the Associated Press through an authoritative source, although the colonel himself was in seclusion.

This source stated Colonel Lindbergh had not yet chosen his definite route and that he had not set a time for the start of the flight. It was said merely the flight will be undertaken "some time this summer."

Advocates Day Of Prayer

Would Set Aside One Day To Pray For Rain In Saskatchewan

Prince Albert, Sask.—One day of prayer for rain should be set aside and observed "throughout the province," stated Hon. J. F. Bryant, Minister of Public Works for Saskatchewan, in an address here.

He referred to the great lack of moisture for the wheat fields in the province, especially in the south. Mr. Bryant officially opened the field day of the Shorthorn Breeders' Association of Saskatchewan.

Ottawa Honors King George

Ottawa, Ont.—The capital was in holiday dress June 3 in honor of His Majesty King George, who was celebrating his 60th birthday. Parliament Hill was almost deserted, the House of Commons and the Senate having taken a day off. All government departments were closed, as were also schools and many business establishments. A royal salute of 21 guns boomed out at 12 o'clock noon.

Butter From Australia

Ottawa, Ont.—A total of 1,422,512 pounds of butter were imported into Canada from Australia during the calendar year of 1930 according to a reply given by Hon. H. H. Stevens, Minister of Trade and Commerce. In the month of April this year, butter imports from the commonwealth totalled 168,000 pounds.

Depressions Always Pass

Most Optimistic Business Observers Recall Difficulties Of Other Times

The Financial Post says: Prior to the panic in 1929, the blindest optimism came from the younger element in financial and business circles, and the older groups—whose memories were vivid as to 1921, and who often recalled the sad days of 1907, 1903 and 1893—were prone to shake their heads at talk of new eras and the disappearance of the business cycle. It speaks well for the charity of these men that they so seldom have reminded the chastened younger generation that the voices of experience were unheeded.

Undoubtedly, the most hopeful indication that the outlook is better now than it has been for some months, is that these men whose memories and business experience go back a generation are now the most optimistic group in the financial community. And as most of them are men of substance and of wide experience, their optimism at this time might be a beacon shining in a dark sky.

It was forgotten in 1928 and 1929 that excessive expansion always had been followed by depression. It is apt to be forgotten now that previous depressions have always been succeeded by periods of prosperity. There are various fundamental situations which must be corrected before prosperity can be wholly restored, but the fact is that in some quarters the correction is being achieved. In some other quarters the situation may get worse before it is better; yet so long as humans consume goods, a trend toward balancing demand to supply must exist, though statistically it is not evident.

Canada has a certain future. There must be faith that the world will continue to progress. These economic experiments which are disturbing the orthodox will fail if they are unsound, and, if they are sound, the world will benefit by their success.

We will not pass from depression into prosperity as one would step from a dark room into the glare of midday. The process of improvement will be slow, even imperceptible, for a time and the sun will be high in the heavens before many realize that there has been a dawn. Thus it has been in the past.

By no means is the trouble in the past. But the world is working to improve conditions and a little faith in the efficacy of sound methods will make the work lighter.

Decline In Dairy Exports

All Items Of Dairy Exports Decreased Since Past Year

With the exception of cheese, which maintained a level with March, exports of all dairy products fell off in April. During the past year all items of dairy exports were decreased. The following figures give the value of exports in the 12 months ended April 30, with totals for the previous 12 months in brackets: Cream, \$2,049,000 (\$4,540,000); fresh milk, \$299,000 (\$881,000); butter, \$836,000 (\$537,000); cheese, \$13,019,000 (\$18,144,000); condensed milk, \$1,329,000 (\$1,722,000); and eggs, \$66,000 (\$424,000).

Aged Car Drivers

According to Dr. Walter Miles, professor of experimental psychology at Stanford University, from one-fourth to one-third of persons over three score and ten can shift gears or release the accelerator at the approach of danger just as quickly as the average adult. He claims old age is not invariably associated with delayed time reaction, and the aged persons vary among themselves just as do the adults of 30 or 40.

Not Affected By Depression

Unfortunately, depression seems not to have hit the automobile dealer in the United States. Incomplete returns from the several states, compiled by an insurance company, indicate that motor vehicles killed 9 per cent. more persons in the first quarter of 1931 than in the corresponding period of 1930.

"And, Emma, don't dare wear my clothes while I am away."—Brummer, Berlin.

W. N. U. 1893

Millionaire's Memories

Convenient To Forget Man Who Fights For Bare Existence

George F. Baker, who died the world's third richest man, was probably the last witness stand once during the famous Pulo investigation of the "Money Trust" and explained that in jelling of his investments and holdings he had completely forgotten a million dollars.

The members of Congress who heard him gasped. Mr. Baker probably never did understand their amazement that such a sum of money could be overlooked, nor why he came to be known as "The Man Who Forgot a Million."

There are a great many men in the United States now who could probably be as casual about millions and as capable of forgetting them. The last income tax statistics disclosed that 504 persons have annual incomes of more than \$1,000,000 a year, and thirty-six have incomes of more than \$5,000,000 a year. Many of them can use or give away or keep track of and remember, some of these men resist income taxes and inheritance taxes that would lift heavy burdens from men who can never forget as much as a \$10 bill. Some of them fight high wage scales and unemployment insurance that would keep the country prosperous and its citizens well and content.

Some of them forget the dreadful significance of 6,000,000 unemployed men as easily as they forget \$1,000,000. Some forget, if they ever knew, the desperation that comes with hunger.—New York World-Telegram.

Modern Literature and Culture

Present Day Literature Offers Abundant Material For Cultivation Of The Mind

Many experienced and broad minded educators assert that modern languages and literatures offer abundant material for the cultivation of mind, character and the finer human sentiments and emotions. The average person never has been able to understand why love of one's fellows, of justice, benevolence and charity, devotion to civic duty and pursuit of noble ideals could not be instilled effectively by modern literatures, philosophies and ethical systems. The notion that the dropping of Latin and Greek constitutes a sacrifice to commercialism, materialism and narrow utilitarianism is arbitrary and gratuitous. The apprehended consequences need not follow, provided the schools and colleges lay due emphasis on the essentials of a liberal and humane culture, and on the sound building of character.—Chicago News.

The Rotation Of The Galaxy

Group Of Stars Massive and Hottest Of All The Stars In The Sky

There has recently been completed at the Dominion Astrophysical Observatory, Department of the Interior, Victoria, B.C., a determination of the motions of a particular group of stars characterized by being the most massive and the hottest of all the stars in the sky. It has been distinctly shown that the whole galaxy is rotating around a very distant centre with a speed in the neighborhood of the sun of about 200 miles a second, but so enormous in its extent that even at this tremendous speed it takes about 250,000,000 years to complete one revolution.

City Versus Country

One reason the city newspaper can print all the news that is fit to print is because he does not have to live in close daily association with his victims as does the country paper man. Another reason is because he has no opportunity for close up view of results of trying to ingratiate personal affairs and laying them bare to public gaze. It is no excuse to say the public demands such things. All of us want to know lots of things that are none of our business.

Honesty In London

An incident in a London, England, bus brought to light the fact that conductors are instructed to issue blanks to passengers who haven't the exact fare and that the passengers, so the company claims, invariably forward the amount due. The best you can do on a Paris bus is to offer a postage stamp instead of cash. It will be accepted.

Although hundreds of varieties of banana are known around the world, only three are commonly known on the American market.

The oldest known naval battle is recorded in vivid pictures on the wall of an Egyptian temple.

Four commercial air services are maintained in Japan by private companies.

Eskimos Become Modernized

Have Gramophones and Motor Boats and Even Automobiles

A hotwater bottle in an Eskimo boat is one of the curiosities of the contact of civilization upon the aboriginal North, recalled by R. Rev. I. O. Stringer, archbishop-elect of Rupert's Land, and for twenty-five years bishop of the Yukon.

The natives today are not backward, Bishop Stringer remarked. The Indian is something of a "hobo mechanic." Eskimos have their motor-boats and gramophones.

Something of an opportunist was one northern Indian in an isolated part of the Yukon who saved up enough money to buy an automobile for lake use in winter. It came by boat. It seemed wrong to let it idle in the summer, so the natives cut a two-mile circle through the woods. One ride around the circle, family included, cost one dollar.

In all his years as missionary since he set out in 1892 for Herschel Island, two thousand miles north of Edmonton, Bishop Stringer said he had not found the native himself the obstacle to christianizing Eskimo and Indian.

It was the "whites" who followed in the wake of the mission, he said, who made the difficult mission.

Winter Egg Supply

Now Is the Time To Put Eggs Away For Winter Use

This is the time of the year when both the quality and price of eggs makes it desirable for the thrifty housewife to "put down" a supply for winter use. Preserved in a solution of either lime-water (1 pound to 5 gallons of water) or water-glass (5 per cent. i.e. 5 pounds water-glass to 10 gallons water) eggs of the commercial grade "fresh extra" or those having an air-cell not over 1/4 inch and weighing full 24 ounces to the dozen, are entirely suitable for all cooking purposes except serving boiled. An earthenware crock, small barrel or other suitable receptacle with a capacity of from 4 to 5 imperial gallons, is ideal for the purpose and will hold from 20 to 30 dozen. Eggs put down in lime-water will prove a real economy for winter use. Also, it is a well-known scientific fact that eggs laid in May and June are better in quality than those laid at any other period of the year because of the bright sunshine and rich supplies of vitamins feed available to hens.

With Good Intentions

Charles M. Schwab Tells Good Story On Himself

The best story Charles M. Schwab told at a recent meeting of newspaper publishers in New York, was on himself. He was explaining how easy he falls when anyone asks him to make a public speech, and illustrated the point by telling of a farmer neighbor who wanted to sell a cow. "I've got a cow I want to sell to you, Charlie," the neighbor said. "Yes, would she fit into my Guinness herd?" "No, I dunno as she would." "Has she got anything to recommend her?" "Wal, I dunno as she has." "Does she give lots of milk?" "No, I can't say as she gives lots of milk, but, Charlie, I can tell you this: She's a kind, gentle, good dispositioned old cow and if she's got any milk she'll give it to you."—Editor and Publisher.

Thirty-two thousand boxes of cut flowers are being shipped from Spalding, England, every week.

Wireworm Menace

By K. M. King and A. P. Aranson, Dominion Entomological Laboratory, Saskatoon

Wireworms cause very heavy losses annually in western Canada, especially in the open prairie areas and the more open of the "break" country. Medium and light soils seem particularly affected, and damage on knolls often is conspicuous. As a rule, the wireworms of this region are found in the older cultivated fields, and their abundance is not necessarily connected with recently broken grass-land, either native or seeded.

Because the pest is exceptionally long-lived (for an insect), damage usually occurs to some extent in the same field year after year, though usually worst just after summerfallow. The loss results from a more or less severe thinning out of the crop during its early stages; often considerable patches or even fields of grain are ruined.

Much of this loss can be avoided. Wireworms are very resistant to nearly every form of attack. In all times, but especially until after the first of June, wireworms are very numerous. Methods of reducing wireworm populations are still in the experimental stage, but the following can be suggested with considerable confidence as to their value:

- (a) Avoid deep plowing or tillage operations in the fall, and at the end of June, every year. Use the rod-weeder where feasible.
- (b) During the summerfallow year cultivate as shallowly as possible until mid-July, then rod-weed deeply, or plow and harrow thoroughly.
- (c) Keep fallow entirely free from weeds, but do not cultivate unnecessarily. (Note: In years and districts where the pale western corn is troublesome, plant work so as to keep completely off the fallow during month of August.)

At present these methods are suggested for use only in fields where wireworms are known to be common.

Hogging Corn Saves Feed

Turning Hogs Into a Field Of Corn Has Been Found Profitable

In a series of four tests at the Brandon Experimental Farm of the Dominion Department of Agriculture, the practice of "hogging" corn, i.e. turning hogs into a field of mature corn to feed, show that material economies in meat feed are possible and that the returns from hogs so fed are substantially greater than the cost of growing corn. The type of hog developed is entirely satisfactory; the practice of "hogging" saves considerable labour in feeding; and it supplies considerable grain for growing hogs at a time when farm grains are most scarce. An ample supply of fresh water must be available on the hogging lot, and tankage supplied by a self-feeder is desirable.

Prince Salutes 'Empress'

The Prince of Wales, who flew to Southampton to inspect the new Canadian Pacific liner "Empress of Britain" before she sailed for Canada May 27, on her maiden voyage, wound up his visit by giving her a parting salute from the air as she steamed out to sea. He piloted one of the latest flying boats himself.

Foxes Are Prolific

Reports from several New Brunswick fox ranches tell of five, six, seven and as high as eight cubs being born to one vixen due to scientific methods of feeding. The average from these districts last year was three. This year, according to reports, it is five.

Vitamin Potency In Fish

Practically All Richer In This Respect Than Other Foodstuffs

Much has been said and published as to the vitamin potency of cod liver oil, but average folk have not probably heard so much about the vitamin content of fish oils generally. As Norwegian scientists have reported, however, the vitamin content of "the various fish oils . . . exceeds that of every other product which has hitherto been examined, both in animal and vegetable kingdoms."

Experiments made by H. N. Brocklebury, now Acting Director of the Dominion's Fisheries Experimental Station at Prince Rupert, B.C., showed that commercial pilchard oil, which is produced in very large quantities in British Columbia, is "a potent source of vitamin D." United States chemists have found that tuna and pilchard oils are "as good as, or better than, cod liver oil in vitamin D," and that salmon oil is as potent in the vitamin which home grades medicinal cod liver oil. Other similar data as to the vitamins in fish might be cited.

Different fish vary, of course, in vitamin content, but all of them apparently are richer in this respect than most other foodstuffs, so that the family which has fish foods regularly on the table may be sure of having in the diet these vitamin substances which are so effective in keeping people strong and healthy. They have the further dietary advantage, moreover, that they are generally more easily digested than a good many other foods. More than sixty varieties of fish and shellfish are available from Canadian waters and, properly cooked, they make very tasty dishes. Carelessly cooked, no food is tastier.—St. Thomas Times-Journal.

Criticism Too Costly

New York Stage Director Had To Think Quickly

The stage director of a new musical show which will be seen in New York soon, didn't like the way a certain block rehearsed. He had been assigned a small role at the suggestion of the producer and the director felt she wasn't able to do justice to it. The other afternoon, during a rehearsal she sang her song and the director grew hot under the collar. "Miss Blank!" he called from the auditorium of the theatre.

"You're fired!" The producer was seated directly behind him. He whispered in the director's ear:—"Don't do that. Her father has \$20,000 in this show." "Ahem!" came from the director. "As I was saying, Miss Blank, you're fired with the sort of ambition that is bound to win. Now sing your number again, dear."

National Park Colourful

One of the main characteristics of Watkins Lake National Park in southern Alberta is the coloring of the rocks. Bands and splashes of tawny gold, greens, and wine colors darkening to purple, make some of the peaks look like a futurist painting, and give to the whole region a warm and colorful appearance.

Wheat Exports

In April, exports of wheat from the Dominion totalled 16,660,843 bushels—more than 3,000,000 bushels in excess of exports for March. Of the total, 15,095,843 bushels were cleared from seaboard ports.

Pour boiling water over lemons before using. This will double the amount of juice.

Many Difficulties In The Way

Professor's Idea Of High Speed Aluminum Trains Hardly Feasible

Professor Wiesinger's proposal to run aluminum trains at over 225 miles an hour will not astonish engineers. They have long been advocating light alloys for railway cars. Even his air propellers hark back to experiments made with a "Zeppelin car" some months ago. Stopping his train—if it ever runs—will probably be more difficult than attaining the speed he has in mind. Early steam locomotives could haul trains at sixty miles an hour, but it was not until the air-brake was invented that high speeds became safe.

Engineers will see the necessity for mounting Wiesinger's train on wheels pitched at an angle of thirty degrees. Stability is thus secured. But the professor will have to face a standardized world. To rebuild the tracks of a continent, if we had to travel whole days in the same car, would entail an investment of billions of dollars. In the world would incur. No doubt changes in terminals would also be called for to accommodate trains that blow themselves along.

Wiesinger's high-speed road will probably go the way of other—of Bler's monorailway, on which 150 miles an hour was to be an ordinary performance, and of Scher's gyroscopically controlled train that was to cross an abyss on nothing more substantial than a steel cable.

Growth Of Edmonton

Population Now Totals 79,639 According To Recent Count

Showing an increase of 1,592 over last year. Edmonton's present bona fide population totals 79,639, it was announced by Thomas Walker, city assessor, on the completion of the annual civic census.

In 1930 the population was 77,557, and in 1929, 74,298.

The civic census was taken on the same basis as a federal census. Mr. Walker stated that, in only persons of at least one year's residence in the city were included. The total does not show non-permanent residents of hotels or persons attending schools, hospitals, colleges and other institutions in the city who are not bona fide residents of Edmonton.

Edmonton has a unique balance of population, the returns showing 39,540 males, and 39,519 females. These are classified as: Males over 21, 24,164; females over 21, 23,236; males under 21, 15,375; females under 21, 16,283.

Magnetic Compass Changes

Direction Of Needle Alters From Year To Year

The direction of the magnetic compass needle at any place changes from year to year. As a great many of the old land boundaries in Canada were surveyed by compass needle, when it is now required to retrace such an old land boundary it is necessary to know how much the needle has changed its direction since the old survey was made. Such information for very many places in Canada and reaching as far back as 1750 has been compiled and published in bulletin form by the Topographical Survey, Department of the Interior.

Use Wooden Heads

Apprentice barbers at Frankfurt, Germany, learn to shave by using blockheads. Since it is difficult to get customers for the young men who are being taught to use the razor, wooden effigies of human heads are used. These remain calm and quiet while the students go over them with their sharp tools, reports Popular Science Monthly.

Range Of Sugar Maple

The natural range of the sugar maple in Canada extends from the Maritime Provinces to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 75 to 80 feet in height and 2 to 3 feet in diameter. It occurs either in pure stands or is found associated with other hardwoods.

"What causes you to want to marry my daughter?" "My creditors"—Hummel, Hamburg.

EXPLORERS PENETRATE STRATOSPHERE AND RETURN SAFELY

After cruising ten miles above the earth in the metal gondola of a balloon, Professor Piccard, of the University of Brussels, and Charles Kipfer his assistant, landed in an ice-field in the Alps, and were found uninjured by a rescue party. The picture shows professor Piccard (left) and Charles Kipfer standing in front of the metal gondola in which they made their epoch stratosphere—or upper atmosphere—cruise.

CHAPTER XIX.—Continued.

"I couldn't get along without you, Uncle Sim. Here's the letter. You'll call me a goose after you've read it! I'll wash away these tears, and I shan't shed any more, I promise."

Better not make no promises," said Simon, as he moved toward the stairs. "Nothin' clears the air like a good cry, 'less it's a thunder storm, and that don't always work, neither."

He went down, and out on the porch, the letter in his hand; but at the sight of Halliday, still talking with the children, he crossed the driveway and joined them by the sand pile.

"You got a letter from Jamaley?" he questioned.

"Why, no," Halliday was slightly puzzled at the question. "The fact is, Mr. Bartlett, my wife is the worst correspondent possible. She usually leaves her letters till the last moment, and then misses the mail; so I've learned not to worry when I don't hear. Did Mrs. Hastings get her letter?"

Simon nodded assent.

"Is her husband coming soon? I thought she wasn't looking well this morning."

"She ain't," said Simon. "She's gone to see the doctor this afternoon. I do no what ails her, but I think she's just plain scared." He lowered his voice, a cautious eye on the children.

"Nick wasn't went out, when little Nick was back, and—maybe you've noticed there's another comin'?"

I wish Nick was to home."

"But surely he'll get back as soon as possible. He wouldn't leave her long at a time like this, or—"

"He don't know a thing about it," broke in the old man quickly. "She didn't want to know know till he come back. He hasn't paid up all the bills for his own sickness, and she thought he'd worry and like as not give up goin' at all if he knew what was loomin' up ahead. That's why she hurried him off, but she needs him now just to give her courage, and—"

(Uncle Sim cleared his throat a bit uncomfortably. "Well," he hesitated, "she's got a letter to do, and Nick—well, he's gone off a-cruisin' in someone's private yacht, bang of your wife, I thought likely you'd heard about the plan."

"With my wife?"

Halliday was all attention.

"Yep," answered Uncle Sim. His eyes apparently on the gorgeous yellow bow that adorned small Martha's curls. "He'd about made up his mind to come straight home, when Miss Halliday blew in with an invitation. I take it some friends o' hers was goin' off to some outlandish places—"

Aching
CORNS
STOP HURTING
INSTANT
RELIEF!

Just a drop or two of Putnam's Corn Extract, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't get any longer, use Putnam's Corn Extract, the one sure relief for sore toes. Sold at every drug store, 35c.

PUTNAM'S

W. N. U. 1893

just the sort o' thing that would tempt a tramp like Nick. I ain't read the letter yet, but I gather he thought he'd oughter not lose the chance. He said they'd drop him somewhere along about a month from now, down Cuba way, where he could get back home. Well, all I got to say is, I hope to God he gets here all right. The sooner the better."

His eyes lifted from the yellow ribbon, to Halliday's face; but the younger man had glanced away.

"Did he say whose yacht they were to go on?"

"Gay said it belonged to some folks that was visitin' your wife last summer. She didn't mention the name."

Halliday looked thoughtful.

"Have them started yet—left Jamaica, I mean?"

"She says they must ha' gone yesterday, or the day before."

"If she needs him couldn't we send a wireless?"

"We don't know the name of the yacht. Gay thinks maybe they'll call it'll come mailed before they get away. This one was written a week ago."

"Then we must wait. I—I'm sorry that Mrs. Halliday was in any way to blame; but I wish Hastings knew the state of affairs here."

"I wish so too, old man! I'd halt a mind to tell the boy myself, before he went; but I ain't no to meddle. Mr. Halliday, and I thought likely Gay knew her own business. She was thinkin' of what was best for Nick, like she always does. Here she comes now. Don't let on I been talkin' or that you see she's been cryin' some. She don't cry very often, but she ain't well, and had sort o' made up her mind he'd be here most any time now."

Gay waved to them cheerfully, but sat down on the porch and took up her sewing. Halliday was silent for a moment, then he said quietly: "When is her baby comin', Mr. Bartlett?"

"Not till along the first o' September. Oh, Nick'll be back; only she says, 'less it's a winter, you let me know if you hear any thing. Mr. Halliday? Maybe you'll get more definite word than what Gay has."

James Halliday doubted, even while he promised to tell Simon at once should anything enlightening come his way. Angela's letter, written the day Nick's was, but, as usual, too late to catch the boat, arrived four days later in the mail that brought another to Gay. Angela wrote:

"Just a line to let you know that I'm off with the Myers on their yacht 'Sea Bird.' We're to cruise for a couple of months, so I can't tell you where to write if you want any word of me, which isn't likely anyway. Might try Havana, and Nassau, if there's anything to say. We'll end at Miami, but goodness knows when. I may interest you to know that Nick says he's anything but a sailor. He wire when we land—not that it will make much difference to you now that you've found another innamorate."

Halliday's brow drew into a puzzled frown; then cleared at the thought that she was referring to small Martha. The note said little more, and he sighed as he laid it down. For years he had scanned Angela's hasty letters eagerly, seeking a word of tenderness that never came. The thing was a habit now. He had ceased to care for tenderness from her; yet the ghost of their dead past still had the power to hurt him. Nick wrote:

"Dearest, in an hour we're off. I'm as excited as a kid at his first Christmas tree. The yacht, 'Sea Bird,' is a beauty—eighty feet long—white paint—brass rails—mahogany trimmings, and all the fixings you read about in fiction. The party consists of Mr. and Mrs. Myer whom we met last summer; their little girl; a sporty-looking old cove named Novell (they picked him up at the Titchfield, I believe), Mrs. Halliday and myself. Honestly, Gay saved for Mrs. H. and the kid, it's not a very congenial-looking crowd. But I shan't mind it. It's places, not people I'm after."

"Talk about 'the ends of the earth!' We're to cruise among the Bahama Islands—the outer Bahamas, many of them uninhabited. Send your letter to Nassau, not Havana. They've decided to drop me there instead where I can catch the Royal Mail for New York. I'll wire on landing, but this is probably the last letter you'll have. Think what a whale of a lot we'll have to talk about! And how I wish you were going, too!"

Five weeks later, on a morning when Gay was wondering if her telegram would come that day, as indeed, she had been wondering for the last week, Sonny appeared at breakfast and handed her the morning paper. She opened it idly, waiting for Uncle Sim to come in from the garden, before she poured his coffee. Sonny ran out to call him, and baby Nick was busy with his oatmeal.

The room was very still. The rustle of the newspaper as Gay spread it open was the only sound, until the

PILE PAIN

Ends Right Away
"The very first time I used 'Doan's' I ended the pain and swelling. I was right away. Stopped swelling and bleeding. Pile gone!"—J. J. Scott, Quilicura relief fund, All drugists.

baby set up a sort of sing-song that he and Sonny had been chanting for the last week:

"My daddy tumin soon—my daddy he tumin—my daddy tumin soon—my daddy—"

The baby stopped; Gay had uttered a little moan that frightened him. She was staring at the paper, reading with blurred eyes the words:

Terrible hurricane in the West Indies and Bahamas. Many small boats go down. United Fruit from Port Antonio makes difficult headway against the storm. No word of the 'Sea Bird,' a gasoline yacht owned by George B. Myer, of Tulsa and Pasadena which left Kingston more than a month ago for a cruise among the outer Bahamas. Last wireless from them was picked up at Key West, twenty-four hours before the storm. On board, besides the crew, were Mr. and Mrs. Myer, their ten-year-old daughter, Marjorie, Mrs. James J. Halliday of Boston, Colonel Charles Novell of Cincinnati, and Nicholas Hastings.

There was a crash of breaking china, and a howl from little Nick. When a moment later Uncle Sim and Sonny rushed in, the baby was screaming with fright, while Gay lay unconscious across the table.

(To Be Continued.)

Canadian Citizenship

Bill Before Commons Sets Forth Qualifications For Canadian Nationality

Second reading was given in the House of Commons to the government bill to define Canadian nationals and to provide for loss or renunciation of Canadian nationality. Sponsored by Hon. C. H. Cahan, secretary of state, the bill sets forth definitely the qualifications for Canadian nationality, and also the process whereby a national of Canada may lose or renounce his nationality. Mr. Cahan indicated that the bill, if passed, the form presented to the House might necessitate some amendments to the Immigration act. As the law now stood, said Mr. Cahan, a man who left Canada for a trip, and was delayed over a year, had to make his way into this country in just the same manner as an immigrant from Siberia or Turkistan. Missionaries who went abroad to pursue their calling, were away a considerable period, and sometimes brought up families in a foreign country, could not claim Canadian nationality for their children.

Prince Albert National Park

Improvements To Be Made This Year In Saskatchewan Playground

Ironing out of bad curves on the gravelled highway in Prince Albert National Park, travelling the five miles of road to the Narrows graded last year, oiling of the main thoroughfare at Waskesiu Lake, and general maintenance work on the gravelled road in the park—these are the items decided upon to date in the 1931 program of the National Park system, according to P. Shaw, engineer in charge of the park's activities in the Saskatchewan playground.

commencement has already been made, a number of miles of highway having been regavelled.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so they give the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Hopes To Become Fire Chief

With the hope of eventually becoming chief of a fire brigade in Calcutta, India, a young Indian has joined the fire department of Birmingham, England. He is Sushil Chandra Das Gupta, and is 24 years old. Calcutta has 700 fire brigades, and the native brigades are officered by Europeans, but the dusky youth believes there is a future for native officers.

The word Canada is said to be derived from the Inroquois word Kanata, a collection of huts.

"KING OF PAIN"
LINIMENT

Dominion Wide Meeting

Saskatoon City Council Favors a Get-Together Gathering To Discuss Unemployment

Dominion-wide conference on unemployment, called by federal authorities to consider the present situation and possible remedies, was approved by the city council of Saskatoon. The motion was suggested by Ald. A. M. Bddy.

There was no doubt in his mind, Ald. Bddy said, that such a conference could do much toward overcoming the present situation. Officials of cities and towns throughout the whole of the Dominion were dealing with their local unemployment problems, and many might be in a position to contribute ideas or plans which would work for improvement, he said.

Desirability of a conference to consider the unemployment question was also suggested by Alderman R. M. Pinder. Some solution, he believed, could be worked out. At present the various bodies, including municipalities, provincial and Dominion, sat back and kept "passing the buck," without any permanent improvement being effected in the situation.

The Dominion Government will continue to give relief to the municipalities on the one-third basis, according to a letter from Hon. G. D. Robertson, Minister of Labor. At present one-third of the cost of direct relief administered here is provided by the Dominion, one-third by the province and the remainder by the city.

In his letter the minister stated it was also the intention of continuing work programmes now under way. Work unfinished in Saskatchewan totalled 169,249 man days.

THE RHYMING OPTIMIST

By Aline Michaelis

(By Aline Michaelis)

What is the cause of
Still good or pure?
Who has decreed your
Loss or your gain?
Why are days shadowed?
Why are days bright?
Whence came your portion
Grief or delight?

Questions keep welling
Up in your heart;
Why do you cherish
Treasures depart?

Still is the answer
As he been:
Still good or evil
Comes from within.
In your soul's soil grow
Flower or weed;
Yours is the thought that
Planted the seed.

For National Park

Movement On Foot For Establishment Of National Park In Southern Saskatchewan

Definite action will be taken by the tourist committee of the Regina young men's board of trade for the establishment of a national park for the southern part of Saskatchewan. The proposed park will be situated just north of Carleton Place, in the Carleton and Fish Lake district.

A resolution was passed by the young men's body asking that the district be turned into a national park. The resolution will be brought before the council of the board of trade, and if passed by that body, will be sent to the Federal Government and representations made for establishment of the park.

New Species Of Blueberry

A new species of blueberry, from the experimental farm at Ottawa, has been tried out on the Sandilands Forest Reserve just east of Winnipeg. The berry is claimed to be as big as a marble and soil tests taken from the district show that it should thrive.

The Man With Asthma, almost long for death and his suffering. He sees ahead only years of endless torment with intervals of rest which are themselves fraught with aching fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

Quint German Custom

In Germany citizens burn winter in effigy every year to make quite certain he dies. This custom, which is known as the Feast of the Victory of Summer, is carried out with great jollification in the old town of Eisenach.

A laboratory has been built underground at the United States Bureau of Standards, where finely accurate optical lenses can be ground with least interference from dust and vibration.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S
"FRUIT SALT"

Cruiser Launched Nameless

German Battleship Slides Down Ways Before Being Christened

Germany's first "pocket battleship," known as the Ersatz Preussen while under construction at Kiel, launched herself, sliding down the ways six minutes ahead of schedule while Chancellor Bruening was still far from the end of his christening address and before President von Hindenburg could hurl a champagne bottle against the warship's bow.

Sixty thousand looked on in astonished silence, forgetting to cheer until just as the bow settled into the water.

"Deutschland be thy name!" President von Hindenburg called after the rapidly receding ship, while the champagne bottle dangled aimlessly in the air before the christening stand for a few seconds and then fell to the to the ground, unsmashed.

Investigation has not yet determined whether one wire of the cables holding the ship fast parted or some one gave the signal to release the last check too soon. Naturally, much uneasiness exists among Kiel sailor folk over what is technically an unchristened ship.

Douglas' Egyptian Liniment is especially recommended for spider, or infection of cow's test. Invaluable also in cases of spavins, curbs and splints.

President Of U.S. Law Body

Charles Evans Hughes, chief justice of the United States, was elected honorary president of the American branch of the International Law Association at the annual meeting held in New York.

Worth Watching

Mary Garden quit grand opera and announced that she is going to tour Canada on a mule. This is going to be worth watching. If there is a creature on earth more temperamental than a coloratura soprano, it is a Corsican mule.

BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Puradine Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

Heard Around Town

Mrs. Berry, who has been in bed for some weeks, is recovering.

Quite a number from Chinook attended the sports at Cereal on Wednesday afternoon.

Mr. Moore is relieving in Mr. Pfeiffer's place at the station while the latter is on his vacation.

Mr. and Mrs. Norman Code left Monday night for Red Deer, where they will make their home.

Mr. and Mrs. Youell are still at Calgary, but it is hoped that Mr. Youell will soon be well enough to return.

Mrs. W. H. Butts visited with friends in Calgary for one week and is visiting at present with her brother and sister at Red Deer.

The eastbound passenger train on Wednesday morning was about six hours late, due to the wash out of a bridge in the Rosebud valley.

A refreshing rain fell in this district yesterday morning, which will help the crops a little, but a soaking rain is needed to make any material improvement in the crop outlook.

The two-cent excise tax on all bank cheques will become effective July 1. It already applies to cheques with a value higher than \$10, but Premier R. B. Bennett in his budget extended it to all cheques.

"Pat" Barry was arrested last Saturday on a charge of common assault and taken to Youngstown. His hearing took place on Monday afternoon, when he was found guilty and was sentenced to thirty days in Lethbridge jail.

The Ladies' Card Club met on Tuesday at the home of Mrs. W. A. Todd. Honors of the evening went to Mrs. W. S. Lee and Mrs. Grace Peterson. The election of officers took place, resulting in: President, Mrs. G. Thompson and secretary Mrs. L. S. Dawson. The next meeting will be at the home of Mrs. Nelson Murray.

Peace Farmer Receives 1.3 Cents a Dozen Eggs

Eggs are selling at one and three-tenths cents a dozen. That is the price a farmer in the Peace River district of Alberta recently received for 30 dozen eggs, according to a letter he has sent Donald M. Kennedy, member of parliament for Peace River.

The farmer lives at Falher, Alberta. Of his egg shipment, seven dozens were graded firsts, 21 dozen seconds and two dozen mixed. A creamery at Westlock, Alta., 200 miles distant, paid \$1.44 for the consignment, the farmer writes, from which \$1.05 was deducted for shipping and other expenses, leaving 39 cents for the farmer.

Kinmundy

Mr. and Mrs. F. Youngren and Mr. Geo. Reede and family were guests at the home of R. Reede Sunday.

Mrs. B. Hampton and children were dinner guests at the home of L. Youngren on Sunday.

There was a good congregation present at the church service last Sunday.

C. Haug spent Sunday afternoon with Mr. and Mrs. O. Blagen. Miss D. Herron spent the week end with friends at Hanna.

Ray Youngren returned to his home Monday last from Calgary, where he has been attending Normal school.

W. H. Butts and Mr. and Mrs. Norman Code, of Chinook, were dinner guests at the G. Seeger home last Sunday.

A number of cars from Chinook went to Blood Indian creek last Sunday, where the occupants spent the day.

Kinmundy ball team were out trying to practice last Sunday. They are planning to play Chinook. Look out boys!

Our fresh air taxicab is laid up just now, taking a rest.

Here and There

Asbestos production in Canada during 1929 set up a new high record, according to the finally revised figures of the Bureau of Statistics. Shipments in 1929 amounted to 395,055 tons, valued at \$12,172,581, an increase of 12.1% in quantity and 17.5% in value as compared with the previous year. The average value received by the operators was \$43.01 per ton, compared with \$41.16 the previous year.

Nipigon trout, known all over the continent as the gamest of game fish, are coming into the spotlight again according to reports from the famous Ontario resort where the annual contest for the largest speckled trout is now in full swing and will continue until September 14. The best entry to date is a 52-lb. fish, measuring 22 inches in length and 14 in girth taken with a single spinner with fly, on a 94-foot rod, by Edmund Stalter, of Paterson, N. J., July 29.

East and West, Orient and Occident, will meet in the British Empire Pipefitters' Convention, one of the most important of the Canadian Pipefitters to be introduced at this year's Highland Gathering and Scottish Music Festival to be held at Banff at the end of August. Pipe-Majors John Clark and E. L. Collins of the Royal Scots Regiment of Scotland, of which Princess Mary is Colonel-in-Chief, will come from the British Isles, while Pipe-Major W. C. MacKie of the Scottish Company of volunteers is on his way to Banff from Hong-Kong.

Prospects for increased earnings during the fall months are good and directors of the Canadian Pacific Railway have no intention of reducing the dividend, said E. W. Beatty, chairman and president of the company, recently in reply to rumors that the dividend might be cut.

Nowadays the world moves on rubber and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria in June bought 300 pairs of shoes with rubber soles from Canada. Barbados took 3,020 pairs and Trinidad 6,555 pairs. In June the export of Canadian automobile tires exceeded \$1,000,000 in value.

Canadian farmers are now producing all the fine tobacco required by Canadian manufacturers, according to a statement just issued by the Dominion Department of Agriculture which also claims that the tobacco is of better quality than that usually imported. Canadian tobacco has also become a factor in the British tobacco market.

An increase of 58% in motor tourist traffic from the United States to New Brunswick is shown in statistics for the 1929 season up to July 31 as compared with the same period last year, according to figures issued by the provincial government Bureau of Information and Tourist Travel from returns from Canadian custom collectors at the 24 ports of entry along the International boundary.

It is not generally known that the Prairie Provinces—Manitoba, Saskatchewan and Alberta—contain important commercial fisheries. In 1929 the commercial value of fish caught in these provinces exceeded \$1,000,000.

Herman Treile, of Wembley, Alberta, former wheat and oats king, won first prize at the Regina Exhibition for his Marquis and Reward wheats. William Darnborough, of Laura, Sask., was second in the Marquis class, and E. Thomson, of Pithou, Sask., came just behind Treile in the Reward class.

Farm Women's Short Course

The Alberta Women's Bureau, Dept. of Agriculture, has again forwarded a circular to the Chinook Institute, announcing Farm Women's Short Courses at the schools of agriculture at Olds and Vermilion. The dates set are Olds, July 13th to 17th, inclusive, and Vermilion, August 3rd to 7th, inclusive. Programs will include informal talks and demonstrations upon subjects of special interest to farm women.

There is no fee for instruction or entertainment. Rates for board and room are very reasonable. Anyone wishing to take advantage of this course kindly see Mrs. M. Chapman, secretary Chinook W.I., before June 15th if possible, as there is an application form to be filled in.

A Calgary man has won the cheque for \$500 offered for the best slogan in the contest just closed by the management of the World's Grain Exhibition and Conference to be held at Regina, July 25—August 6, 1932. The slogan was "Show what you grow and share what you know."

The English Association Football team, representing many of the best secret teams in the Old Country, which will tour Canada, playing games in the major cities of the Dominion during the next two months, arrived at Montreal on board the Duchess of Athol, May 23.

Radio continues to grow in popularity in Canada. Licensed receiving sets at the end of last March totaled 514,701, an increase of 90,558 over the number registered the previous year. Figures for the year to March 31, 1931 represent a set for every 19 of the population.

Included in the brilliant passenger list that will feature the maiden voyage of the Empress of Britain, 42,500-ton flagship of the Canadian Pacific Atlantic fleet at the end of May, will be Lord Rothermere, great English publicist and owner of a string of British newspapers, including the London Daily Mail.

Representative French railway experts touring this country and the United States recently made a thorough inspection of Canadian Pacific transportation facilities, steamships, hotels and terminals, gathering a considerable body of information with a view to renewal of material and equipment on the Chemin de Fer du Nord, in France.

Empire Day, held this year on a Monday, made a long week-end holiday, in every part of the Dominion, holiday-makers took advantage of the new week-end fares recently inaugurated by the Canadian Pacific Railway, charging fare and a quarter for return trips to any point in the country. This reduction is in force every where in Canada every week end. (7-3)

Collholme Collections

The Children's Day programme held at the Collholme church last Sunday was well patronized by those who came from near and far. A good programme was presented and was thoroughly enjoyed by all.

G. R. Robinson and family and J. D. McKinnon spent Sunday afternoon at the Morrison home.

Miss Grace Laidlaw spent the week end at the Morrison home.

F. Hobson and family spent Sunday afternoon and evening at the W. Wilson home.

N. Morrison was kicked on the arm by a horse last week. He was taken to Cereal where an examination by Dr. Esler took place. It was found that no bones were broken.

J. McPherson and family spent Sunday last at the home of D. McLennan.

Erwart Duncan, who had his foot hurt a week ago, was taken to Dr. Esler last Saturday, where it was found that two bones in his foot were broken. He is now moving about with a cast on his foot and a pair of crutches under his arms.

Alex McLennan leaves his rifle at home now-a-days, so the rabbits have full run on his land.

Miss Pearl Stevenson celebrated her birthday last Monday, June 8.

L. D. Fowler, of Calgary, was the soloist at the recent meeting of the W.F.M.S. His solo was enjoyed by all.

Lubricating Oil's

Commenting upon the greater power, efficiency and smoothness of operation which distinguish modern high compression, high speed automobiles from those of ten years ago, the Stewart Warner Alomite Corporation of Canada, Limited, says:

"Automotive engineers have left no stone unturned in their search for improvements, and they are continually striving for still finer performance. Finer grades of gasoline also have been developed to keep pace with the advance in

engine design. It takes cleaner, more volatile fuels to deliver the greater power and performance built into these modern motors, and the refining companies lost no time in the development of new gasolines.

"But there has been little change in the processing and production of lubricating oils. Automotive engineers and lubrication experts realize, however, that the long life, smoothness and flexibility of operation of these modern motors depend largely upon the proper lubrication of every minute part.

"Alomite engineers determined to develop a new type of motor oil to meet the changing trend in motor design. An exhaustive search in the oil markets of the world failed to reveal any motor oil which they felt would do. It takes more than good cloth to make a good suit of clothes, but even the most expert tailor can't make a good suit out of shoddy. Alomite selected Pennsylvania Grade Crude, which is considered by authorities to be the source of the finest oil.

"Then began the development of a process of refining an oil that would satisfy the requirements of modern automobile engines as no other oils could. Ten years were spent in exhaustive research and experiments, tests in laboratories and on the open road, under a great variety of climatic conditions.

"The result is an utterly new type of motor oil, because the Alomite process preserves the carefully balanced structure of 100% pure Pennsylvania crude. A rugged, full bodied, extremely oily oil which retains its lubricity under the most severe service, is produced. It seals in piston power protects bearings with great efficiency and has a remarkable heat resistance."

It is said that leading lubrication authorities report that this truly modern oil adequately meets the newly realized lubricating requirements of modern automobile motors.

The village council is repairing the sidewalk on the east side of Main street.

SUMMER IN THE MARITIMES

The pictures show the new Lakeside Hotel, built by the C.P.R. at Yarmouth, N.S., center of the bathing pool in the grounds of the hotel below. The Algonquin Hotel at St. Andrews-by-the-Sea, finest of typical Maritime sea, sand and sunshine.

Sunshine and gleaming sands! The laughter of scamping childhood mingled with the organ-swell of the Atlantic breakers at the cream on the shores of the Bay of Fundy! Here is holiday health and happiness. All along the beautiful coast of Nova Scotia are countless watering places, whose names have become household words among lovers of the seaside. Excellent hotels are at the disposal of visitors and the shoreward scene is no less lovely than its maritime companion. The Annapolis Valley needs no introduction to Canadians or to its countless American visitors. It has been rightly called Canada's Devon, with its flourishing orchards and pasture lands and its countless picturesque farms and hamlets. A few hours journey by palatial steamer from Saint John, N.B., Digby, with its Pine Hotel as the hub of activity, rivals Kenilworth with its Cornwallis Inn, and Yarmouth with its new Lakeside Inn, in extending hospitality to the holiday-seeker. Golf, tennis, bathing, fishing, and innumerable beautiful motor drives are only a few of the recreations available. On the New Brunswick mainland, farther as it were, to this stately family, the Algonquin Hotel, at St. Andrews-by-the-Sea, stands a standard of summering unrivaled anywhere on the continent. The luxurious hotel, with its many attached cottages, is the centre of one of the most famous colonies of the Dominion. The golf links, known throughout the length and breadth of the country as one of the finest championship courses available, are met namesake of the home of the royal and ancient game in old Scotland. The Canadian Pacific Railway places all these resorts within easy access of their many devotees.
